COMPREHENSIVE ANNUAL FINANCIAL REPORT

**For the Fiscal Year Ended
June 30, 2020**

THIS PAGE INTENTIONALLY LEFT BLANK

MISSION STATEMENT

It is the mission of the Public Employees' Retirement System to:

- ◆ Provide public workers and their dependents with a retirement program that provides a reasonable base income for retirement or for periods where a disability has removed a worker's earning capacity.
- ◆ Encourage those workers to enter into and remain in government service for such periods of time to give public employers and the people of the State of Nevada the full benefit of their training and experience.
- ◆ Provide an orderly method of promoting and maintaining a high level of service to the public through an equitable separation procedure available to employees at retirement or upon becoming disabled.

December 2, 2020

Dear Chair and Members of the Board:

It is a pleasure to present the Comprehensive Annual Financial Report (CAFR) of the Public Employees' Retirement System of Nevada (System or PERS), a component unit of the State of Nevada, for the fiscal year ended June 30, 2020.

The financial statements included in this report are the responsibility of the System's management and have been prepared in accordance with generally accepted accounting principles as promulgated or adopted by the Governmental Accounting Standards Board (GASB). In management's opinion, the financial statements present fairly the fiduciary net position of the System at June 30, 2020, and changes in fiduciary net position for the year then ended.

The System was established by the Nevada Legislature in 1947. By July 1, 1949, the System had approximately 3,000 members and 64 retirees. At the end of fiscal year 2020, the System had 215 participating employers, 111,185 active members, and 72,741 benefit recipients. The System is comprised of two sub-funds, Regular, consisting of members who are not police or fire employees, and Police and Firefighters (Police/Fire). The Regular sub-fund was established to provide retirement, disability, and survivor benefits for public employees with the exception of those who are police officers or firefighters. The Police/Fire sub-fund was established to segregate accounting for retirement and survivor benefits related to members who are police officers or firefighters. All services provided by staff are performed in order to meet those objectives. For more specific information on plan provisions, please refer to the Plan Summary, beginning on page 133.

Included in the Financial Section of this CAFR, beginning on page 24, is Management's Discussion and Analysis (MD&A). Users of the financial statements are encouraged to review the MD&A, which contains a statement overview, highlights for the year, and a short analysis of the financial statements comparing the current and previous year.

We hope that you and the members of the System will find this CAFR helpful in understanding your public employees' retirement system.

INTRODUCTORY SECTION

Major Initiatives

Legislation

The Nevada Legislature convenes on a biennial basis in odd-numbered years. During the interim between legislative sessions, PERS worked with legislative staff on pension-related issues. Following the 2019 legislative session, the Public Employees' Retirement Board (Retirement Board or Board) continues to review the System's Official Policies and make necessary modifications to ensure compliance with applicable law.

System Governance

The System's existing governance principles, policies, and charters define the role of the Retirement Board and executive management, guide the conduct and decision-making of the Retirement Board, and document and preserve the System's policies.

Managing the funding issue internally to PERS is paramount to overall success of the System. Contribution rate stability and responsible funding are key goals of the System. The System continually reviews trends in actuarial liabilities and maintains a realistic recognition of plan costs in order to govern the plan in a fiscally sound manner. Staff will work to manage expectations of stakeholders and other interested parties on funding issues and contribution rates through continued public relations outreach and education regarding the financing and management of the System.

A positive, open working relationship promotes sound fiduciary administration of the trust. All parties work together for the exclusive benefit of the members and beneficiaries of the System and Board governance practices promote this directive. Adhering to the responsibilities of the charters for the Board, Board Chair, and Executive Officer lay the framework for success, defining the objectives of each. Executive staff keeps Board members abreast of issues affecting the System both in the State and on a national level. Communication is designed to be helpful, organized and not overwhelming to assist the Board in the discharge of fiduciary duties by ensuring pertinent information is delivered in a timely and coherent fashion.

The System shall maintain effective internal controls over financial reporting and observe the highest standards in financial reporting. Staff will continue to diligently monitor and update internal controls as necessary as well as continue to evaluate enterprise-wide risk through an assessment process. The System will continue to maintain the standards necessary to receive the Public Pension Coordinating Council award in recognition of meeting professional standards for plan design and administration as set forth in the Public Pension Standards, the Government Finance Officers Association (GFOA) award for excellence in financial reporting for the Comprehensive Annual Financial Report, and the GFOA award for excellence in financial reporting for the Popular Annual Financial Report.

A Liaison Officer Conference was planned for May 2020 and then rescheduled to October 2020. Unfortunately, due to the pandemic this semi-annual event was cancelled. PERS' staff created an Employer Advisory Group to communicate upcoming changes. This will be a valuable way to communicate and collaborate with employer representatives in preparation of the new Pension Administration System.

Information Technology

The IT department is dedicated to maintaining an efficient pension management system that can provide for all operational needs. Technology efforts are driven by business goals as well as statutory and pension fund industry mandates. During the last fiscal year, the System worked with a project manager and data conditioning vendor to assist with the initiation of a new Pension Administration System. The Request for Proposal process was completed in fiscal year 2020 and a vendor was selected. Contract negotiations will be finalized and the initiation of the project will begin in fiscal year 2021.

Strategic Planning

Annually, PERS' executive staff reviews the System's strategic plan for updates, including both additions and deletions. The Strategic Plan covers a five-year period and is updated annually by the Executive Officer in consultation with the Board. Strategic Plan revisions are prepared in conjunction with the Operational Yearly Plan and management plans for the individual departments. The Operational Yearly Plan supports the Strategic Plan by setting forth the business plan for the System for the year.

Summary of Financial Information

The System's management is responsible for maintaining internal controls designed to provide reasonable assurance that transactions are executed according to management's authorization, recorded to maintain accountability for assets, and to allow the preparation of financial statements in accordance with generally accepted accounting principles. The internal controls include written policies and procedures and are reviewed periodically by the System's internal audit staff and independent auditors.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Because the cost of the control should not exceed the benefits to be derived, the objective is to provide reasonable, rather than absolute assurance, that the financial statements are free of any material misstatements. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process. Therefore, it is possible to design into the process safeguards to reduce, though not eliminate, this risk. We believe our internal control structure considers these risks and that we maintain a system of internal controls designed to provide reasonable assurance that assets are properly safeguarded, transactions are properly executed, and financial statements are reliable. The valuation of costs and benefits requires estimates and judgments by management.

INTRODUCTORY SECTION

The Retirement Act requires a biennial financial audit of the System by a certified public accountant. The Board chooses to conduct such audits on an annual basis, rather than biennially, to ensure the System's financial statements are fairly presented, in all material respects, in accordance with generally accepted accounting principles. The System is also required by statute to submit a biennial budget proposal to the Budget Division of the State of Nevada, which must be incorporated with the State Executive Budget and approved by the Nevada Legislature.

The following schedule is a summary of the pension trust funds' additions and deductions for the years ended June 30:

	<u>2020</u>	<u>2019</u>
Additions	\$ 5,297,802,723	\$ 5,500,355,708
Deductions	<u>2,846,937,950</u>	<u>2,647,789,977</u>
Change in net position	<u><u>\$ 2,450,864,773</u></u>	<u><u>\$ 2,852,565,731</u></u>

Additions decreased approximately \$202.6 million compared to fiscal year 2019, due primarily to a decrease in the net investment income and an increase in contributions. Deductions increased by \$199.1 million between 2019 and 2020 due to increases in benefit payouts and a decrease in refunds of contributions.

Funding

The System's basic funding policy provides for periodic contributions at a level pattern of cost as a percentage of salary throughout an employee's working lifetime in order to accumulate sufficient assets to pay benefits when due. Although the System receives an annual actuarial valuation indicating the contribution rates required to fund the System on an actuarial reserve basis, contributions actually made are in accordance with the rates derived from the actuarial rates and then rounded according to statute.

The actuarial funding method used is the Entry Age Normal Cost Method. This method is used to calculate liabilities using a year-by-year closed amortization period where each amortization period is set at 20 years, in addition to using other significant actuarial assumptions detailed beginning on page 87. Plan rates in effect for the year ended June 30, 2020, are presented on page 36 in the Financial Section of this report. In addition, Required Supplementary Information on pages 48-50 show changes in employers' net pension liability, related ratios, and ten-year schedules of employer contributions and the money-weighted rate of return on investments. The ten-year schedules of funding progress are on page 97 of the Actuarial Section. The actuarial funded ratio for all members is 76.1% in 2020, an increase from 75.3% in fiscal year 2019.

Investments

Investment performance plays an important role in the System's ability to provide retirement benefits to its members. The Board's investment philosophy centers on time tested investment principles and efficient, cost-effective portfolio management.

The investment portfolio is designed to meet the funding objectives of the System while taking the least possible risk. Investment of the System's assets is governed by the prudent person standard. This standard states that the Board may invest the System's funds in every type of investment which persons of prudence, discretion, and intelligence acquire or retain for their own account.

The System's investment portfolio is well diversified by asset class, investment structure, and individual security. In fact, the System's portfolio currently holds over 1,600 individual securities from 23 different countries. The Board uses these portfolio components to maintain strict control of the fund's risk/return profile.

Asset allocation is the most significant factor influencing the risk and return of the investment program. Since inception, more than 90% of the System's investment performance is explained by asset allocation. Determination of the fund's long-term asset allocation involves estimating the expected return and risk of major types of investments and blending them into a portfolio which meets the System's risk/return objectives.

The fair value of the System's investment assets at the end of fiscal year 2020 was \$45.7 billion. The portfolio return objective includes a premium over the Consumer Price Index (CPI). The System's investment return objective over calculated CPI in fiscal year 2020 was 5.4%. The System's total return (gross of fees) on investments for that same time period was 7.2%, which includes both realized and unrealized gains. Fiscal year 2020 investment performance was primarily driven by strong returns from U.S. stocks and U.S. Treasury bonds, which were bolstered by declining interest rates.

The fund's annualized rate of return (gross of fees) is 9.3% since inception (36 years) exceeding the long-term actuarial funding objective. The fund is competitive on a risk-adjusted basis, ranking in the top 10% of large public funds for that same time frame. The investment section, beginning on page 63, addresses specific activity and results in the portfolio.

GFOA Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the System for its comprehensive annual financial report for the fiscal year ended June 30, 2019 (see page 17). This was the 31st consecutive year the System achieved this prestigious award.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe our current report continues to meet the Certificate of Achievement Program requirements and are submitting it to the GFOA for consideration again this year.

PPCC Award

The Public Pension Coordinating Council awarded the Public Pension Standards Award to the System for the fiscal year ended June 30, 2020 (see page 18). The award is designed to commend public employee retirement systems for implementing and maintaining high professional standards. PERS has received the award every year it has been offered.

INTRODUCTORY SECTION

Professional Services

Professional consultants are hired to perform services essential to the efficient operation of the System. The Independent Auditor's Report, Consultant's Report of Investment Activity, and the actuary's certifications are included in this report. The System's consultants are listed on pages 15 and 64.

Acknowledgements

This report reflects the combined effort of the System's administrative staff. It is intended to provide both complete and reliable information as a basis for making management decisions, determining compliance with legal provisions, and determining the responsible stewardship of assets contributed by the members and their employers.

I would like to express my appreciation to the staff, consultants, Board, and other associates whose efforts ensured the successful operation of the System in 2020.

Respectfully submitted,

Tina Leiss

Independent Auditor's Report

Public Employees' Retirement Board
of the State of Nevada
Carson City, Nevada

Report on the Financial Statements

We have audited the accompanying financial statements of the Public Employees' Retirement System of Nevada (the System), a component unit of the State of Nevada, as of and for the year ended June 30, 2020, and the related notes to the financial statements, which collectively comprise the System's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

The System's management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the fiduciary net position of the System as of June 30, 2020, and the changes in its fiduciary net position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 7 to the financial statements, the total pension liability for the System, based on the actuarial valuation as of June 30, 2020, exceeded the System's fiduciary net position by \$13.9 billion. The actuarial valuation is very sensitive to the underlying assumptions, including a discount rate of 7.50 percent, which represents the long-term expected rate of return. Our opinion is not modified with respect to this matter.

Other Matters

Prior-Year Comparative Information

The financial statements include partial prior-year comparative information. Such information does not include all of the information required to constitute a presentation in conformity with accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the System's financial statements for the year ended June 30, 2019, from which such partial information was derived.

We have previously audited the System's 2019 financial statements, and we expressed an unmodified opinion on the financial statements in our report dated December 9, 2019. In our opinion, the partial comparative information presented herein as of and for the year ended June 30, 2019, is consistent, in all material respects, with the audited financial statements from which it has been derived.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, the schedule of changes in net pension liability and related ratios, the schedule of employer contributions and the schedule of investment returns, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Information

Our audit was conducted for the purpose of forming an opinion on the financial statements that collectively comprise the System's basic financial statements. The other supplementary information, as listed in the table of contents, and the introductory, investment, actuarial, statistical and plan summary sections are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory, investment, actuarial, statistical, and plan summary sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Macias Gini & O'Connell LLP

Sacramento, California
December 2, 2020

MANAGEMENT'S DISCUSSION AND ANALYSIS

This Management's Discussion and Analysis (MD&A) of the financial performance of the Public Employees' Retirement System of Nevada (System or PERS) provides an overview of the System's financial activities for the fiscal year ended June 30, 2020. The MD&A is designed to focus on comparative analysis of the last two years, current year's activities, resulting changes, and currently known facts. Readers are encouraged to consider the information presented in conjunction with the financial statements as a whole, which follow the MD&A.

The System is responsible for administering retirement, disability, and survivor benefits for Regular members (consisting of employees within the State of Nevada and local governments which include schools, counties, cities, special districts, etc.) as well as Police/Fire members throughout the state.

Overview of Basic Financial Statements

The basic financial statements consist of: (1) the Statement of Fiduciary Net Position, (2) the Statement of Changes in Fiduciary Net Position, and (3) the Notes to the Financial Statements. Required Supplementary Information and Other Supplementary Information are also presented.

The **Statement of Fiduciary Net Position** includes all of the System's pension trust fund assets, liabilities, and the net position at the end of the fiscal year.

The **Statement of Changes in Fiduciary Net Position** reports additions to and deductions from the pension trust fund during the fiscal year presented. Over time the increase or decrease in net position serves as a useful indicator of the health of the System's financial position.

The **Notes to the Financial Statements** provide additional information that is required by generally accepted accounting principles.

The **Required Supplementary Information** following the notes to the financial statements consists of schedules and related notes pertaining to changes in employers' net pension liability, employers' contributions, investment returns, and actuarial assumptions. These schedules are intended to provide additional information useful in evaluating the condition of the defined benefit pension plan.

Other Supplementary Information details administrative expenses, investment expenses, consultant and professional service expenses, in addition to Schedules of Fiduciary Net Position and Changes in Fiduciary Net Position broken down between Regular and Police/Fire members.

MANAGEMENT’S DISCUSSION AND ANALYSIS

Financial Highlights

As of and for the Years Ended June 30
(in millions)

	2020	2019
Total investments	\$ 45,668.3	\$ 43,815.8
Net investment income	3,137.5	3,468.1
Contributions	2,157.3	2,029.4
Benefit payments	2,805.0	2,601.8
Refunds of contributions	29.5	34.0
Transfers of contributions	-	0.2
Administrative expenses	12.4	11.8
Plan fiduciary net position	\$ 46,735.1	\$ 44,284.3
Plan fiduciary net position as % of total pension liability	77.0%	76.5%

Total pension liability as of June 30, 2020, was \$60,663,454,082.

Financial Analysis

The fair value of investments for fiscal year 2020 increased by 4.2% to \$45,668.3 million from \$43,815.8 million in 2019. Investment income for 2020 was \$3,137.5 million. The PERS investment program returned 7.2% in fiscal year 2020. The 9.3% annualized return since inception (36 years) exceeds the actuarial objective.

Pending trades payable	607,096,841	320,766,021	286,330,820	89.3
Obligations under securities lending activities	205,982,715	253,210,571	(47,227,856)	(18.7)
Total liabilities	<u>834,142,246</u>	<u>590,966,040</u>	<u>243,176,206</u>	41.1
Net position restricted for pension benefits	<u>\$ 46,735,117,356</u>	<u>\$ 44,284,252,583</u>	<u>\$ 2,450,864,773</u>	5.5 %

Cash and cash equivalents increased 369.9% between 2019 and 2020. Cash and cash equivalents can fluctuate from year to year and are unpredictable.

Pending trades receivable and payable increased 93.5% and 89.3%, respectively, between 2019 and 2020. Pending trades fluctuate from year to year and are unpredictable.

Investments at fair value increased \$1.9 billion from 2019 to 2020 primarily due to the 7.2% total return generated by the System's investments in 2020. The investment performance was primarily driven by strong returns from U.S. stocks and U.S. Treasury bonds.

MANAGEMENT’S DISCUSSION AND ANALYSIS

**CONDENSED STATEMENT OF CHANGES IN FIDUCIARY NET POSITION
For the Years Ended June 30,**

	<u>2020</u>	<u>2019</u>	Increase/ (Decrease) from 2019 to 2020	Percentage Increase/ (Decrease) from 2019 to 2020
Contributions	\$ 2,157,256,517	\$ 2,029,395,070	\$ 127,861,447	6.3 %
Net investment income	3,137,476,177	3,468,148,453	(330,672,276)	(9.5)
Other income	3,070,029	2,812,185	257,844	9.2
Total additions	<u>5,297,802,723</u>	<u>5,500,355,708</u>	<u>(202,552,985)</u>	(3.7)
Benefit payments	2,805,034,501	2,601,770,272	203,264,229	7.8
Refunds of contributions	29,504,997	33,987,510	(4,482,513)	(13.2)
Transfer of contributions	-	219,889	(219,889)	(100.0)
Administrative expenses	12,398,157	11,812,306	585,851	5.0
Other expenses	295	-	295	N/A
Total deductions	<u>2,846,937,950</u>	<u>2,647,789,977</u>	<u>199,147,973</u>	7.5
Change in net position	2,450,864,773	2,852,565,731	(401,700,958)	(14.1)
Net position, beginning of year	<u>44,284,252,583</u>	<u>41,431,686,852</u>	<u>2,852,565,731</u>	6.9
Net position, end of year	<u>\$ 46,735,117,356</u>	<u>\$ 44,284,252,583</u>	<u>\$ 2,450,864,773</u>	5.5 %

Contributions increased 6.3% between 2019 and 2020. This is primarily due to the increase in contribution rates implemented on July 1, 2019.

Net investment income decreased \$331 million from 2019 to 2020 because the System returned 7.2% in 2020 which was lower than the 8.5% returned in 2019.

Benefit payments increased 7.8% in 2020 primarily due to the number of beneficiaries increasing from 70,056 in 2019 to 72,741 and the average monthly benefit increasing from \$3,177 in 2019 to \$3,271 in 2020.

Refunds of contributions decreased 13.2% and there were no transfers of contributions in 2020. These numbers are unpredictable each year and depend on individual elections made by active and inactive members.

Contacting the System’s Financial Management

This financial report is designed to provide plan participants, employers, citizens, taxpayers, and others with a general overview of the System’s finances and to demonstrate the Board’s oversight of the System. If you have questions about this report or need additional financial information, please contact PERS at 775-687-4200.

The accompanying notes are an integral part of these financial statements.

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – Summary of Significant Accounting Policies

Financial Reporting Entity

The Public Employees' Retirement Board (Retirement Board or Board) is the governing body of the Public Employees' Retirement System of Nevada (System or PERS) with responsibility for administration and management. This autonomous, seven-member Retirement Board is appointed by the Governor of the State of Nevada.

The System has no relationship with another entity that meets the criteria for inclusion as a component unit and has not included any other entity as a component unit of its financial reporting entity.

The System is classified as a component unit of the State of Nevada for financial reporting purposes in accordance with the provisions of the Governmental Accounting Standards Board (GASB) because the State Legislature retains certain significant governing powers over the System.

Basis of Accounting

The accompanying financial statements of the System have been prepared in conformity with generally accepted accounting principles (GAAP) in the United States of America.

The System uses the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded in the accounting period in which they are earned and become measurable. Per statute, employee and employer contributions are recognized in the reporting period for which they are due. Expenses are recorded when the corresponding liabilities are incurred, regardless of when payment is legally made. Benefits and refunds are recognized when currently due and payable in accordance with the terms of the plan.

Actuarially determined liabilities for retirement benefits are not recorded in the financial statements.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, and the reported amounts of additions and deductions during the reported period. Actual results could differ from those estimates.

NOTES TO FINANCIAL STATEMENTSOrganization

The System is comprised of two sub-funds.

Regular sub-fund – Established to provide retirement, disability, and survivor benefits for public employees with the exception of those who are police officers or firefighters.

Police/Fire sub-fund – Established to segregate accounting for benefits related to members who are police officers or firefighters.

Assets of the System can legally be used to pay both Regular and Police/Fire beneficiaries.

Cash and Cash Equivalents

Cash and cash equivalents include both operating cash on deposit with the System's commercial bank and cash on deposit with the custodial bank. Cash on deposit at the System's custodial bank includes investments in Invesco Treasury Portfolio Short-Term Investments Trust. This fund invests in short-term, high credit quality money market instruments. These instruments are direct obligations of the U.S. Treasury and repurchase agreements backed by Treasury obligations.

Contributions Receivable

No allowance for doubtful accounts has been established since the System anticipates no material collection loss with respect to contribution receivables.

Benefit Payments

Benefits are paid during the month they are due; therefore, no benefit payable is recorded each month or at year-end.

Federal Income Tax

The System is a qualified pension plan under Section 401(a) of the Internal Revenue Code (IRC) and, as such, is required to withhold federal income tax from member and benefit recipient payments in accordance with the IRC. As a public entity, the System is not required to file a federal income tax return with the Internal Revenue Service.

Investments

The Regular sub-fund and the Police/Fire sub-fund are accounted for separately, based upon actual funds contributed and an allocation of the combined investment earnings. Individual investments are not specifically identified as belonging to either the Regular sub-fund or the Police/Fire sub-fund.

NOTES TO FINANCIAL STATEMENTS

Plan investments are reported at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is assumed that both buyer and seller are rational and have a reasonable knowledge of relevant facts. Securities traded on national or international exchanges are valued at the last reported sales price at current exchange rates. U.S. treasuries are valued based on observable market data. The fair value of real estate third-party investments is established by an independent third-party valuation firm in conjunction with Member Appraisal Institute (MAI) independent appraisals. For private equity partnership investments, estimated fair value is determined in good faith and provided by the general partner of the respective investment partnership, based on the most recent financial information available for the underlying companies at the measurement date adjusted for subsequent cash flow activities through June 30, 2020. In addition, each partnership undergoes an independent audit on an annual basis.

Investment purchases and sales are recorded as of the trade date. Dividend income is recognized on the ex-dividend date. Investment income is recognized as earned. Net change in the fair value of investments is determined by calculating the change in fair value of investments between the beginning of the fiscal year and the end of the fiscal year, less purchases of investments at cost, plus sales of investments at fair value.

There are certain market risks, credit risks, foreign exchange currency risks, or event risks which may subject the System to economic changes occurring in certain industries, sectors, or geographies.

Property and Equipment

Property and equipment consist of furniture, equipment, computer hardware, and software at cost net of accumulated depreciation. Assets are capitalized when the expected life is greater than one year and the initial cost is \$5,000 or more per unit. Intangible assets are capitalized for the development stage only (design, configuration, installation, and testing). Depreciation is calculated using straight-line depreciation method over five years. The term “depreciation” includes amortization of intangible assets.

Administrative Expenses

The funds for administering the System are provided by the assessment of an administrative fee for each member and benefit recipient. Monthly fees at June 30, 2020, were \$5.79 for each Regular member and benefit recipient and \$6.11 for each Police/Fire member and benefit recipient. PERS is required by statute to submit a biennial budget proposal to the Budget Division of the State of Nevada, which must be incorporated with the State Executive Budget and approved by the Nevada Legislature.

Comparative Totals

The basic financial statements include a partial presentation of prior year comparative financial statements but not at the level of detail required for a presentation in conformity with the accounting principles generally accepted in the United States of America. Accordingly, such information should be read in conjunction with the System’s financial statements as of and for the year ended June 30, 2019, from which the partial information was derived.

NOTES TO FINANCIAL STATEMENTS

NOTE 2 – Plan Description

History and Purpose

PERS administers a cost-sharing, multiple-employer, defined benefit public employees’ retirement system which includes both Regular and Police/Fire members. The System was established by the Nevada Legislature in 1947, effective July 1, 1948. The System is administered to provide a reasonable base income to qualified employees who have been employed by a public employer and whose earning capacities have been removed or substantially impaired by age or disability.

Membership

At June 30, 2020, the number of participating public employers and active members was:

<u>Entity Type</u>	<u>Number of Employers</u>	<u>Number of Members</u>
State of Nevada and Related Agencies	23	18,772
Nevada System of Higher Education	1	3,944
Schools	68	51,418
Counties	16	13,314
Cities	19	9,839
Hospitals	8	4,311
Utility, Irrigation, and Sanitation Districts	19	899
Special Districts and Agencies	61	9,318
	<u>215</u>	<u>111,815</u>

A complete list of participating employers can be found in the Statistical Section.

NOTES TO FINANCIAL STATEMENTS

Any public employer in the State of Nevada may have its Regular or Police/Fire employees covered by the System. Retired, active, and inactive membership at June 30 was as follows:

	<u>2020</u>
Regular retired members:	
Service retirees	56,733
Beneficiaries and survivors	<u>6,643</u>
	<u>63,376</u>
Police/Fire retired members:	
Service retirees	8,134
Beneficiaries and survivors	<u>1,231</u>
	<u>9,365</u>
Total benefit recipients	<u><u>72,741</u></u>
Inactive members entitled to but not yet receiving benefits:	
Regular	16,475
Police/Fire	<u>923</u>
Total inactive members	<u><u>17,398</u></u>
Active members:	
Regular	98,228
Police/Fire	<u>13,587</u>
Total active members	<u><u>111,815</u></u>
Total retired, active, and inactive membership	<u><u>201,954</u></u>

Benefits

Benefits, as required by the Nevada Revised Statutes (NRS or statute), are determined by the number of years of accredited service at time of retirement and the member's highest average compensation in any 36 consecutive months with special provisions for plan members entering the System on or after January 1, 2010. Benefit payments to which participants or their beneficiaries may be entitled under the plan include pension benefits, disability benefits, and survivor benefits.

Monthly benefit allowances for members are computed at 2.5% of average compensation for each accredited year of service prior to July 1, 2001. For service earned on and after July 1, 2001, this multiplier is 2.67% of average compensation. For plan members entering the System on or after January 1, 2010, there is a 2.5% multiplier for all years of service. Regular plan members entering the System on or after July 1, 2015, have a 2.25% multiplier. The System offers several alternatives to the unmodified service retirement allowance which, in general, allow the retired employee to accept a reduced service retirement allowance payable monthly during his or her lifetime and various optional monthly payments to a named beneficiary after his or her death.

NOTES TO FINANCIAL STATEMENTS

Post-retirement increases are provided by authority of NRS 286.575–.579. See Plan Summary for details.

Vesting

Regular members entering the system prior to January 1, 2010, are eligible for retirement at age 65 with five years of service, at age 60 with 10 years of service, or at any age with 30 years of service. Regular members entering the System on or after January 1, 2010, are eligible for retirement at age 65 with five years of service, or age 62 with 10 years of service, or any age with 30 years of service. Regular members entering the System on or after July 1, 2015, are eligible for retirement at age 65 with five years of service, at age 62 with 10 years of service, at age 55 with 30 years of service, and at any age with 33 1/3 years of service.

Police/Fire members entering the system prior to January 1, 2010, are eligible for retirement at age 65 with five years of service, at age 55 with 10 years of service, at age 50 with 20 years of service, or at any age with 25 years of service. Police/Fire members entering the System on or after January 1, 2010, are eligible for retirement at age 65 with five years of service, or age 60 with 10 years of service, or age 50 with 20 years of service, or at any age with 30 years of service. Only service performed in a position as a police officer or firefighter may be counted towards eligibility for retirement as Police/Fire accredited service.

The normal ceiling limitation on monthly benefit allowances is 75% of average compensation. However, a member who has an effective date of membership before July 1, 1985, is entitled to a benefit of up to 90% of average compensation. Both Regular and Police/Fire members become fully vested as to benefits upon completion of five years of service.

Plan Member Contributions

The authority for establishing and amending the obligation to make contributions, and member contribution rates, is set by statute. New hires, in agencies which did not elect the Employer-Pay Contribution (EPC) plan prior to July 1, 1983, have the option of selecting one of two contribution plans. One plan provides for matching employee and employer contributions, while the other plan provides for employer-pay contributions only. Under the matching Employee/Employer Contribution plan a member may, upon termination of service for which contribution is required, withdraw employee contributions which have been credited to their account. All membership rights and active service credit in the System are canceled upon withdrawal of contributions from the member's account. If EPC was elected, the member cannot convert to the Employee/Employer Contribution plan and cannot withdraw these contributions.

NOTE 3 – Contributions Required and Contributions Made

The System's basic funding policy provides for periodic contributions at a level pattern of cost as a percentage of salary throughout an employee's working lifetime in order to accumulate sufficient assets to pay benefits when due.

NOTES TO FINANCIAL STATEMENTS

Although the System receives an actuarial valuation on an annual basis indicating the contribution rates required to fund the System on an actuarial reserve basis, contributions actually made are in accordance with the required rates established by the Nevada Legislature. These statutory rates are increased/decreased pursuant to NRS 286.421 and 286.450.

The Public Employees’ Retirement Act requires an adjustment in the statutory contribution rates on July 1 of each odd-numbered year, based on the actuarially determined rates indicated in the actuarial valuation report for the immediately preceding year. Rates are only adjusted upward if the new rates are more than 0.50% higher than the existing rate for Employer-Pay and more than 0.25% higher for Employee/Employer. Rates are only adjusted downward if the new rates are more than 2.00% lower than the existing rate for Employer-Pay (and adjusted only by the amount in excess of 2.00%) and more than 1.00% lower than the existing rate for Employee/Employer (and adjusted only by the amount in excess of 1.00%). Rates are rounded to the nearest 0.25% of payroll.

Rates in effect for the year ended June 30, 2020, were as follows:

<u>Regular Employees</u>	<u>Actuarial Determined Rate*</u>	<u>Statutory Rate</u>
Employer-pay plan	29.65%	29.25%
Employee/employer plan (matching rate)	15.50	15.25
<u>Police/Fire Employees</u>		
Employer-pay plan	43.33%	42.50%
Employee/employer plan (matching rate)	22.41	22.00

*From June 30, 2019, actuarial valuation

Under the Employer-Pay provisions, the contributions made by employers on behalf of employees are not credited to the plan member’s account and are not refunded upon termination; however, they are reported as plan member contributions. For employees covered by the Employer-Pay provisions, average compensation is increased by half the total contributions made by the public employer and may not be less than it would have been if contributions had been made by the plan member and the employer separately.

The Judicial Retirement System (JRS) was established in 2001 to provide benefits for the retirement, disability, or death of all justices of the Supreme Court and district judges. In fiscal year 2006 justices of the peace and municipal court judges began participating in JRS on a voluntary, employer-by-employer basis. Each participating individual who has service credit in PERS may transfer, subject to statutory time frames and requirements, to JRS. At the time of transfer all of the individual’s contributions and the related liability to the System for that individual are moved from PERS to JRS. PERS did not transfer any contributions to JRS in the year ended June 30, 2020.

NOTES TO FINANCIAL STATEMENTS

NOTE 4 – Retirement Fund Contributions of PERS’ Employees

Administrative employees of PERS (as a participating employer) are plan members of the System. All participating public employers make contributions to the System at the same percentage of salary rate for Regular members as required by statute. Actuarially determined contribution requirements for administrative employees of the System are the same as all other employers within the System. Employer contributions for administrative employees were \$689,772 for the year ended June 30, 2020, and were paid for by the PERS Administration Fund.

NOTE 5 – Deposit and Investment Disclosures

The investments of the System are governed primarily by the “prudent person” standard. The prudent person standard, as set forth in NRS 286.682, authorizes the Board to invest the System’s funds in “every kind of investment which persons of prudence, discretion and intelligence acquire or retain for their own account.”

Investment Policy

The System’s policies* which determine the investment portfolio target asset allocation are established by the Board. The asset allocation is reviewed annually and is designed to meet the future risk and return needs of the System. The following was the Board adopted policy target asset allocation as of June 30, 2020:

Asset Class	Target Allocation
U.S. stocks	42%
International stocks	18
U.S. bonds	28
Private markets**	12
Total	100%

*The System’s current Investment Objectives and Policies may be found on the PERS website www.nvpers.org.

**As of June 30, 2020, the Private markets allocation includes 6% Private real estate and 6% Private equity.

Rate of Return

For the year ended June 30, 2020, the annual money-weighted return on pension plan investments was 7.15%. The money-weighted rate of return expresses investment performance adjusted for cash flows.

The majority of the System’s investments are held by the Depository Trust Company (DTC) in DTC’s nominee name, and trading is conducted through DTC’s book-entry system. The holder of record for the System is The Bank of New York Mellon.

NOTES TO FINANCIAL STATEMENTS

Custodial Credit Risk – Deposits

Custodial credit risk for deposits is the risk that, in the event of the failure of its depository financial institution, the System will not be able to recover its deposits.

At June 30, 2020, the carrying amount of the System's commercial cash deposits was \$12,666,184 and the commercial bank balance was \$17,972,601. Of the bank balance, \$250,000 was insured by the Federal Deposit Insurance Corporation (FDIC). The remaining commercial bank balance is, per a depository pledge agreement between the System and the System's commercial bank, collateralized at 102% of the collected funds on deposit (increased by the amount of accrued but uncredited interest, reduced by deposits covered by FDIC). These collateral securities are held by the System's agent in the System's name.

The custodial cash balance at June 30, 2020, was \$26,501,726. Custodial cash is swept nightly from the custodial bank to an overnight short-term investment fund held outside the bank. Funds arriving at the bank after the overnight sweep deadline are part of the custodial bank cash reserve and are covered up to the FDIC limit, any amount in the cash reserve in excess of this limit is subject to custodial credit risk. The custodial bank carries insurance covering destruction of cash or securities on or off premises with a limit of \$875,000,000 per occurrence.

Credit Risk – Investments

Credit risk for investments is the risk that an issuer or other counterparty will not fulfill its obligations to the System and *custodial credit risk for investments* is the risk that, in the event of the failure of the counterparty to a transaction, the System will not be able to recover the value of investment or collateral securities that are in the possession of an outside party.

System policies provide protection from undue investment credit risk by requiring the following:

- Investments in direct obligations of the U.S. Treasury including bills, bonds, and repurchase agreements secured by those obligations.
- U.S. Treasury money market mutual funds must be SEC registered 2a-7 and AAA rated by at least two of Moody's, S&P, or Fitch and whose investment guidelines are substantially equivalent to and consistent with the System's overall short-term investment criteria.
- Short selling and the use of leverage is not permitted.

There is no credit risk assigned to U.S. Treasury securities as these are explicitly guaranteed by the U.S. Government. It is important to note, however, that the value of U.S. Treasury obligations fluctuate based on non-credit-related factors, such as interest-rate movements, which could cause future price declines despite government backing.

NOTES TO FINANCIAL STATEMENTS

Cash equivalents include \$734.4 million investment in Invesco Treasury Portfolio Short-Term Investments Trust, which is not rated. The System additionally holds \$12,649.9 million in U.S. Treasury securities which are explicitly guaranteed by the U.S. Government.

Concentration of credit risk is the risk of loss that may be attributed to the magnitude of an investment in a single issuer. As of June 30, 2020, the PERS portfolio has no single issuer exposure that comprises 5% or more of the overall portfolio, excluding investments issued or explicitly guaranteed by the U.S. Government. Also, the System does not have an investment in any single issuer that represents 5% or more of the fiduciary net position. Therefore, there is no concentration of credit risk.

Equity portfolios shall be suitably diversified to the extent that an adversity affecting a particular sector or issuer will not impact a disproportionate share of the investment manager portfolio.

In addition, the investment policy requires that no more than 10% of the System's assets shall be managed on a permanent basis by a single investment firm in active strategies. A single firm may manage up to 30% of the System's assets on a permanent basis in index strategies. No asset manager may oversee more than 30% of the System's assets. The System's assets shall not permanently constitute more than 20% of any firm's assets within the asset class (equity, bonds, real estate, or private equity) managed for PERS.

Staff shall provide an annual report to the Board of assets under management consistent with this policy.

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The System mitigates interest rate risk through portfolio diversification as discussed previously. The System's investment policy and investment portfolio counsel mandates permit investment only in bonds within the Bloomberg Barclays U.S. Treasury Index.

FINANCIAL SECTION

NOTES TO FINANCIAL STATEMENTS

The segmented time distribution method is used to determine investment maturity time horizons. The following table shows the fair value of fixed income and short-term securities and the applicable investment maturities as of June 30, 2020.

INVESTMENT MATURITIES

(in years)

Investment Type (in millions)	Less than 1	1 to 5	6 to 10	More than 10	Total
Cash equivalents*	\$ 734.4	\$ -	\$ -	\$ -	\$ 734.4
U.S. treasuries	-	12,694.9	-	-	12,694.9
Total	<u>\$ 734.4</u>	<u>\$ 12,694.9</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 13,429.3</u>

*Cash equivalents consist of investments in Invesco Treasury Portfolio Short-Term Investments Trust.

Investment maturities above have been provided by the System's custodial bank, The Bank of New York Mellon.

The above table does not include commercial cash of \$12.6 million, cash in custodial bank of \$26.5 million, or other cash equivalents of \$0.4 million.

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of an investment or a deposit. The System mitigates foreign currency risk through portfolio diversification as discussed previously, along with asset allocation policy limits on international assets. The System's investment policy maintains a target allocation to international stocks of 18%. All international stock holdings are constituents of the MSCI World ex USA Index.

NOTES TO FINANCIAL STATEMENTS

The System's exposure to foreign currency risk in U.S. dollars as of June 30, 2020, is summarized in the following table.

CURRENCY BY INVESTMENT AND FAIR VALUE

(in millions)

Currency Type	Equity	Private Equity	Pending Transactions	Cash	Total
Australian Dollar	\$ 533.9	\$ -	\$ 0	\$ 0.1	\$ 534.2
British Pound Sterling	1,113.7	23.4	(0.1)	1.5	1,138.5
Canadian Dollar	793.4	-	(0.7)	1.3	794.0
Danish Krone	185.3	-	(0.1)	0	185.3
Euro	2,534.9	282.7	0.4	0.7	2,818.7
Hong Kong Dollar	252.6	-	-	1.0	253.6
Israeli Shekel	25.2	-	(0.1)	0.2	25.3
Japanese Yen	2,013.0	-	(2.5)	6.4	2,016.9
New Zealand Dollar	26.0	-	-	0.1	26.1

Swiss Franc	814.6	-	(0.1)	0.1	814.6
Total	\$ <u>8,663.7</u>	\$ <u>306.1</u>	\$ <u>(3.0)</u>	\$ <u>12.8</u>	\$ <u>8,979.6</u>

Derivatives

The System held no derivative transactions during the current fiscal year.

FINANCIAL SECTION

NOTES TO FINANCIAL STATEMENTS

Securities Lending

The System maintains a securities lending program by authorization of NRS 286.682, the “prudent person” standard previously described. Securities loaned under this program consist of U.S. Treasury Obligations, U.S. equity securities, and international equity securities. Collateral received consists of cash and securities issued by the U.S. Government, its agencies, or instrumentalities. The System has no discretionary authority to sell or pledge collateral received.

At June 30, 2020, the weighted average maturities were 2 days for loans outstanding and 1 day for collateral/reinvestments. Collateral received for the lending of U.S. securities must equal at least 102% of market value, plus accrued interest in the case of fixed income securities. Collateral received for the lending of international securities must equal at least 105% of market value, plus accrued interest in the case of fixed income securities. The securities lending program allows only overnight repurchase agreements collateralized by U.S. government obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities within the reinvestment portfolio. In addition, PERS’ securities lending agent provides full indemnification against losses incurred in the collateral reinvestment program.

The System has no credit risk exposure to borrowers because the associated value of the collateral held exceeds the value of the securities borrowed. At June 30, 2020, the System had collateral of 104.3%. Collateral consisted of cash and securities issued by the U.S. Government, its agencies, or instrumentalities. In addition, securities loaned may not exceed 33⅓% of the total portfolio. Loss indemnification due to borrower default is provided by PERS’ securities lending agent. There were no losses during the period resulting from borrower default.

The fair value of securities loaned at June 30, 2020, was \$1,325,374,331. Cash collateral received in securities lending arrangements is reported on the Statement of Fiduciary Net Position at fair value, as an asset with a related liability.

The following table represents the collateral received for the outstanding securities lending transactions as of June 30, 2020.

	Cash	Non-Cash	Total
Collateral Received	\$ 205,982,715	\$ 1,176,884,160	\$ 1,382,866,875

For fiscal year 2020, the net income from securities lending was \$4,086,256.

NOTES TO FINANCIAL STATEMENTS

NOTE 6 – Fair Value

The System holds investments that are measured at fair value on a recurring basis. The System categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. Investments measured and reported at fair value using Level inputs are classified and disclosed in one of the following categories:

Level 1 – Quoted prices are available in active markets for identical investments as of the reporting date. The types of investments included in Level 1 include U.S. Treasuries and listed stocks.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable.

Level 3 – Valuations derived from valuation techniques in which significant inputs or significant value drivers are unobservable.

The following table presents fair value measurements as of June 30, 2020:

FAIR VALUE LEVELS
(in millions)

	6/30/2020	Level 1	Level 2	Level 3	Total
U.S. treasuries	\$ 12,694.9	\$ 12,694.9	\$ -	\$ -	\$ 12,694.9
Stocks					
Common stock	28,178.9	28,178.9	-	-	28,178.9
Preferred stock	43.0	43.0	-	-	43.0
Total stocks	28,221.9	28,221.9	-	-	28,221.9
Total investments by fair value level	\$ 40,916.8	\$ 40,916.8	\$ -	\$ -	\$ 40,916.8
Investments measured at the net asset value (NAV)					
Real estate	2,115.6				
Private equity	2,635.9				
Total investments measured at the NAV	4,751.5				
Total investments	\$ 45,668.3				

Stocks and bonds securities classified in Level 1 of the fair value hierarchy are valued using prices quoted in active markets for those securities.

FINANCIAL SECTION

NOTES TO FINANCIAL STATEMENTS

The following table presents investments measured at the NAV as of June 30, 2020:
(in millions)

	Fair Value	Unfunded Commitments	Redemption Frequency	Redemption Notice Period
Real estate separate accounts*	\$ 2,115.6	\$ -	N/A	N/A
Private equity**	2,635.9	1,516.9	N/A	N/A
Total investments measured at the NAV	<u>\$ 4,751.5</u>	<u>\$ 1,516.9</u>	<u>N/A</u>	<u>N/A</u>

*Real estate separate accounts. This type includes two core real estate separate accounts that invest in U.S. industrial, multi-family, office, and retail properties. The fair values of the investments in this type have been determined based on third-party appraisals net of outstanding debt. The property values are managed by the Altus Group which values the real estate assets on a quarterly basis and oversees the engagement of and management of third-party appraisers who value the properties annually. The System owns each property through 201(C)(25) holding corporations or limited liability companies with the system as sole shareholder. The properties can be put up for sale at any time.

**Private equity. This type includes a single portfolio investing in and acquiring private equity investment partnerships located in the United States and Europe. The System does not have the ability to withdraw its investments from these investment partnerships. Interest in an investment partnership can be transferred or sold only upon the approval of the general partner of the respective investment partnership.

For private equity investment partnerships, fair value considers, among other factors, the reported net asset value (NAV) of the investment as determined in good faith by the general partner of the respective investment partnership. Because of the inherent uncertainty in valuing investments in investment partnerships for which no active, public market exists, or where the net realizable value may be significantly affected by a lack of liquidity or other market conditions, the fair value reported is an estimate and could significantly differ from the value that could be realized in a secondary market transaction and/or from the amounts ultimately realized.

The general partners of the investment partnerships generally report NAV based on the fair value of the underlying portfolio companies, as well as the other assets and liabilities held by the investment partnership. Investments that have a negative fair value have losses allocated to the portfolio that exceed the amounts invested. Owing to the general partners' expertise and proprietary knowledge of the portfolio company investments, the System generally utilizes the NAV as the basis for the reported investment values. The System may, in good faith, apply an appropriate adjustment to the NAV reported by the general partner of the respective investment partnership, if deemed necessary.

Due to the reporting time frame of private investment fund managers, which report performance on a one-quarter lag from the end of the performance quarter, fair values as of June 30, 2020, are based on actual March 31, 2020, fair values, adjusted for cash flows and public shares received by PERS but not yet sold as of June 30, 2020.

NOTES TO FINANCIAL STATEMENTS

NOTE 7 – Net Pension Liability

The components of the net pension liability at June 30, 2020, were as follows:

Total pension liability	\$ 60,663,454,082
Plan fiduciary net position	<u>(46,735,117,356)</u>
Net pension liability	<u>\$ 13,928,336,726</u>
Plan fiduciary net position as a percentage of the total pension liability	77.0%

Actuarial Assumptions

The total pension liability was determined as part of the GASB Statement No. 67 actuarial valuation as of June 30, 2020. It is important to note that the GASB rules only redefine pension liability for financial reporting purposes. The System continues to develop and adopt funding policies under current practices. The actuarial assumptions were based on the results of an experience study for the period from July 1, 2012, through June 30, 2016.

The entry age actuarial cost method is used for actuarial valuations. The following assumptions were applied to all periods included in the measurement:

Inflation	2.75%
Salary increases	4.25% to 9.15% for Regular members and 4.55% to 13.90% for Police/Fire members, vary by service, including inflation
Investment rate of return	7.50%, including inflation
Mortality Rates (Regular and Police/Fire)	

Healthy: Headcount–Weighted RP-2014 Healthy Annuitant Table projected to 2020 with Scale MP-2016, set forward one year for spouses and beneficiaries.

For ages less than 50⁽¹⁾, mortality rates are based on the Headcount–Weighted RP-2014 Employee Mortality Tables. Those mortality rates are adjusted by the ratio of the mortality rate for members at age 50 to the mortality rate at age 50 from the Employee mortality tables listed above. The mortality rates are then projected to 2020 with Scale MP-2016.

Disabled: Headcount–Weighted RP-2014 Disabled Retiree Table, set forward four years.

⁽¹⁾ The RP-2014 Healthy Annuitant Mortality Tables have rates only for ages 50 and later.

NOTES TO FINANCIAL STATEMENTS

Pre-Retirement: Headcount–Weighted RP-2014 Employee Table, projected to 2020 with Scale MP-2016.

The RP-2014 Headcount–Weighted Mortality Tables, set forward one year for spouses and beneficiaries, reasonably reflect the projected mortality experience of the Plan as of the measurement date. The additional projection of 6 years is a provision made for future mortality improvement.

<u>Asset Class</u>	<u>Long-Term Geometric Expected Real Rate of Return</u>
U.S. stock	5.50%
International stock	5.50%
U.S. bonds	0.75%
Private markets	6.65%

Discount Rate

The discount rate used to measure the total pension liability was 7.50% as of June 30, 2020. The projection of cash flows used to determine the discount rate assumed plan contributions will be made in amounts consistent with statutory provisions and recognizing the plan’s current funding policy and cost-sharing mechanism between employers and members. For this purpose, all contributions that are intended to fund benefits for all plan members and their beneficiaries are included, except that projected contributions that are intended to fund the service costs for future plan members and their beneficiaries are not included.

Based on those assumptions, the pension plan’s fiduciary net position was projected to be available to make all projected future benefit payments for current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2020.

Future Payroll Growth

In projecting plan contributions as described above, the System experience was projected to be consistent with the valuation assumptions, except that payroll was projected to grow at 5% per year. For the purpose of calculating the actuarial determined contribution rate, the total payroll growth assumption for future years is 5.5% per year for Regular and 6.5% for Police/Fire.

NOTES TO FINANCIAL STATEMENTS

Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the net pension liability using the discount rate of 7.50%, as well as what the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.50%) or 1-percentage-point higher (8.50%) than the current rate:

1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
\$ 21,722,824,038	\$ 13,928,336,726	\$ 7,447,799,867

NOTE 8 – Risk Management

The System is exposed to various risks of loss related to theft of, damage to, and destruction of assets; injuries to employees and others; and court challenges to fiduciary decisions. To cover these risks, the System maintains commercial building and contents insurance, vehicle liability and collision/comprehensive insurance, general liability insurance, worker’s compensation insurance, and employee fidelity bonds. For coverage included within the State of Nevada’s policies, the System pays its premium directly to the State. The System’s building/contents insurance is placed with a private insurance company. There have never been any insurance settlements which exceeded insurance coverage.

NOTE 9 – Litigation

The System is involved in litigation relating to various matters. In the opinion of the management, after consulting with legal counsel, the outcome of these matters is not expected to have a material effect on the financial statements.

2018	8.54
2019	8.45
2020	7.15

**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE YEAR ENDED JUNE 30, 2020**

Methods and Assumptions Used in Calculations of Actuarially Determined Contributions

The actuarially determined contribution rates in the schedule of contributions are calculated as of June 30. The following actuarial methods and assumptions were used to determine contribution rates reported in that schedule.

Valuation date: Actuarially determined contribution rates are calculated in annual actuarial valuations as of June 30

Actuarial Cost Method: Entry Age Normal Actuarial Cost Method. Entry Age is the age at the time the participant commenced employment. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of salary, with Normal Cost determined based on the plan provisions and benefit accrual rate applicable to that individual.

Amortization Policy: **For funding purposes**, the UAAL, (i.e., the difference between the Actuarial Accrued Liability and the Valuation Value of Assets), as of June 30, 2011 shall continue to be amortized over separate 30-year period amortization layers based on the valuations during which each separate layer was previously established.

Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of June 30 was amortized over a period equal to the truncated average remaining amortization period of all prior UAAL layers. This occurred until the average remaining amortization period was less than 20 years. At that point, amortization periods of 20 years are used for actuarial gains and losses.

Any new UAAL as a result of change in actuarial assumptions or methods was amortized over a period equal to the truncated average remaining amortization period of all prior UAAL layers. This occurred until the average remaining amortization period was less than 20 years.

**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE YEAR ENDED JUNE 30, 2020**

At that point, amortization periods of 20 years are used for assumption or method changes.

Unless an alternative amortization period is recommended by the Actuary and accepted by the Board based on the results of an actuarial analysis:

- a. with the exception noted in b., below, the increase in UAAL as a result of any plan amendments will be amortized over a period of 15 years;
- b. the increase in UAAL that would result from a temporary retirement incentive will be pre-funded by the participating employer(s).

UAAL layers shall be amortized over “closed” amortization periods so that the amortization period for each layer decreases by one year with each actuarial valuation.

UAAL layers shall be amortized as a level percentage of payroll so that the amortization amount in each year during the amortization period shall be expected to be a level percentage of covered payroll, taking into consideration the current assumption for general payroll increase.

If an overfunding exists (i.e., the total of all UAAL becomes negative so that there is a surplus), such surplus and any subsequent surpluses will be amortized over an “open” amortization period of 30 years. Any prior UAAL amortization layers will be considered fully amortized, and any subsequent UAAL will be amortized over 20 years as the first of a new series of amortization layers.

**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE YEAR ENDED JUNE 30, 2020**

These amortization policy components will apply separately to each of the Regular and Police/Fire UAAL cost groups.

Asset Valuation Method:

Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the actuarial value, and is recognized over a five-year period, further adjusted, if necessary, to be within 30% of the market value.

Actuarial Assumptions:

Assumed Inflation Rate:

FY11-FY16: 3.5% per annum

Investment Rate of Return:

FY11-FY16: 8.0%

FY17-FY20: 7.5%

Retirement Age: Varies based on years of service

Mortality Rates:

FY11-FY13:

Healthy: RP-2000 Combined Healthy Mortality Table, set forward one year for females and police/fire members (no age set forward for males)

Disabled: RP-2000 Disabled Retiree Mortality Table, set back three years for regular members, set forward eight years for regular and police/fire female members, and set forward for ten years for male police/fire members

**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE YEAR ENDED JUNE 30, 2020**

FY14-FY16:

Healthy:

For non-disabled male regular members it is the RP-2000 Combined Healthy Mortality Table projected to 2013 with Scale AA. For non-disabled female regular members it is the RP-2000 Combined Healthy Mortality Table, projected to 2013 with Scale AA, set back one year. For all non-disabled police/fire members it is the RP-2000 Combined Healthy Mortality Table projected to 2013 with Scale AA, set forward one year.

Disabled:

The mortality table used in the actuarial valuation to project mortality rates for all disabled regular members and all disabled police/fire members is the RP-2000 Disabled Retiree Mortality Table projected to 2013 with Scale AA, set forward three years.

FY17-FY20:

Healthy:

Headcount-Weighted RP-2014 Healthy Annuitant Table projected to 2020 with Scale MP-2016, set forward one year for spouses and beneficiaries.

For ages less than 50⁽¹⁾, mortality rates are based on the Headcount-Weighted RP-2014 Employee Mortality Tables. Those mortality rates are adjusted by the ratio of the mortality rate for members at age 50 to the mortality rate at age 50 from the Employee mortality tables listed above. The mortality rates are then projected to 2020 with Scale MP-2016.

Disabled:

Headcount-Weighted RP-2014 Disabled Retiree Table, set forward four years.

⁽¹⁾ The RP-2014 Healthy Annuitant Mortality Tables have rates only for ages 50 and later.

**NOTES TO REQUIRED SUPPLEMENTARY INFORMATION
FOR THE YEAR ENDED JUNE 30, 2020**

Pre-Retirement: Headcount–Weighted RP-2014 Employee
Table, projected to 2020 with Scale MP-
2016.

The RP-2014 Headcount–Weighted Mortality Tables, set forward one year for spouses and beneficiaries, reasonably reflect the projected mortality experience of the Plan as of the measurement date. The additional projection of 6 years is a provision made for future mortality improvement.

September 30, 2020

The Public Employees' Retirement System of Nevada (PERS) investment portfolio finished the fiscal-year on June 30, 2020 with strong total fund performance.

Fiscal Year 2020 can be divided into two distinct economies: pre-pandemic and post-pandemic. The global economy that existed from July 2019 to February 2020 was marked by historically low rates of unemployment (3.6%) and moderate inflation (2.3%). By fiscal year-end the economy had almost completely reversed with unemployment growing to 11.1%, inflation dropping to 0.4% and U.S. GDP shrinking by a record 32%.

The U.S. bond market provided strong returns for the PERS portfolio as the markets roiled from the abrupt shutdown of the global economy. The S&P 500 went from record highs in mid-February to losing 34% of its value at the trough on March 23rd. As the stock market entered its first bear market in nearly 12 years, the bond market experienced days of low liquidity as credit markets froze and 10-year yields decreased by 150 bps to below 1%, providing strong returns in the second half of fiscal year 2020. The active Treasury yield curve experienced unprecedented volatility as yields dropped to 58 bps in April. This significant downward shift in rates across maturities for Treasury securities delivered a fiscal year-end 2020 return for the Bloomberg Barclays Treasury Index of 10.2%. The U.S. Federal Reserve and the U.S. Congress stepped in with massive monetary and fiscal stimulus (\$5 trillion) through the ramp up of bond buying across the board including Treasury, Corporate and Mortgage securities and the passage of the CARES Act in April 2020. The increased market volatility throughout the 2020 fiscal year provided the Nevada PERS fund with several opportunities to rebalance the total portfolio allocation. The high quality, liquid assets profile of the fund positioned the portfolio to sell expensive assets and buy at market lows. As a result, due to disciplined rebalancing, Nevada PERS was able to add close to \$1 billion in assets to the total fund.

As of fiscal year-end, net assets of the Nevada PERS portfolio were \$46.6 billion representing an increase of nearly \$3 billion. The total return for the portfolio for FY2020 was 7.2%, a strong recovery from a low of -3.4% at the end of the third quarter. The strong performance of the fund over 5 years (7.7%) and 10 years (9.6%) places PERS in the 1st and 3rd percentile of large public defined benefit plans, respectively. Since inception, over the past 36 years, the Nevada PERS portfolio has earned 9.3%, ranking the plan higher than 80% of large public plans.

In March 2020, the Board of Nevada PERS approved the transition to a new benchmark for the portfolio's fixed income allocation from the Bloomberg Barclays U.S. Treasury Index to the Bloomberg Barclays 1-3 Year U.S. Treasury Index. The migration to assets with shorter maturity dates reduced the risk of the bond allocation and the overall risk profile of

the total fund. Asset Allocation for Nevada PERS as of fiscal year-end 2020 was 42.0% in U.S. stocks, 18.8% in International stocks, 27.3% in U.S. bonds, 4.6% in Private Real Estate, 5.7% in Private Equity and 1.6% in cash. The portfolio is appropriately positioned for medium-term uncertainty due to current pandemic conditions.

INVESTMENT REVIEW

Introduction

The investment program is designed to generate a long-term return that meets the System's objective while minimizing risk. The structure and administration of the portfolio is defined by the prudent person standard. The standard states that the Board may invest the System's funds in every type of investment which persons of prudence, discretion, and intelligence acquire or retain for their own account under similar circumstances. The Board's investment philosophy centers on time tested investment principles such as maintaining consistent exposure to the capital markets, buying assets at lower prices and selling them at higher prices through disciplined rebalancing, and keeping costs low by utilizing index management. Developing a sound long-term investment strategy and faithfully adhering to that strategy in both strong and weak market environments has been a key element in the fund's success.

The System's investment assets reported in the Investment Section are presented on the same basis of accounting as described in Note 1 of the Notes to Financial Statements, fair value.

The System's Investment Objectives and Policies detail the fund's long-term investment goals, management responsibilities, return/risk expectations, and monitoring requirements. These policies are subject to change at any time by the Board and are reviewed thoroughly at least annually to ensure that they continue to reflect the System's expectations.

Objective

The investment objective of the System is to:

- Generate a 7.5% long-term investment return which exceeds the rate of inflation (CPI) by 4.75% by capturing market returns within each asset class.
- Invest so that the short-term volatility of returns will not cause the System to alter its long-term strategy.
- Structure an investment program which is sufficiently uncomplicated to control the ability to consistently meet return and risk objectives.

Chart 1, on page 71, demonstrates that the investment portfolio, over the last ten years, has captured the real return (inflation) objective in seven of those years. The objective was CPI + 3.0% until September 30, 2000; CPI + 3.5% from October 1, 2000 through September 30, 2002; CPI + 3.75% from October 1, 2002 through September 30, 2003; CPI + 4.5% from October 1, 2003 through November 30, 2017; and CPI + 4.75% thereafter. Chart 2, on page 71, details annualized returns for long-term periods ended June 30, 2020. The System's 7.2% return for fiscal year 2020 was driven primarily by strong returns from U.S. Stocks, U.S. Treasury Bonds, and Private Markets.

INVESTMENT SECTION

Note: Inception on Chart 2 refers to July 1, 1984, the date the System began calculating total return versus annual yield. For all other charts, inception refers to the point at which the System began including that particular investment vehicle in the portfolio.

Asset Allocation

Asset allocation is the most significant factor influencing the risk and return of the investment program. Since inception more than 90% of the System's investment performance is explained by asset allocation. Determination of the fund's long-term asset allocation involves estimating the expected return and risk of major types of investments and blending them into a portfolio which meets the System's risk/return objectives.

To establish an appropriate long-term asset allocation strategy, the Board evaluates expected return and risk for each of the major asset types (stocks, bonds, private markets). These asset classes are then combined in the most efficient manner possible to construct a portfolio that matches the risk and return needs of the fund. By diversifying the System's investments in multiple asset classes, the Board is able to reduce the volatility of annual investment earnings. In addition, the Board employs a disciplined rebalancing policy to manage market volatility and to ensure the portfolio's exposures are consistent with the System's long-term asset targets.

The target allocation for the fund was adopted by the Retirement Board in June 2018 and implemented at the beginning of the 2019 fiscal year. As of June 30, 2020, the target allocation was 28% U.S. Bonds, 42% U.S. Stocks, 18% International Stocks, and 12% Private Markets. The June 30, 2020, asset class allocation by Manager Directive is shown in Chart 3, page 72.

Diversification

After the asset allocation strategy is established, the Board implements a portfolio management structure that is designed to capture the market objective in each asset class. The most efficient and cost-effective way to capture market returns is by gaining market exposures through fully replicated index funds. As a result, the System employs a 100% index structure in all public market asset classes. The U.S. Stock allocation is indexed to the S&P 500 Index, which represents roughly 80% of the total U.S. stock market capitalization. Similarly, the International Stock allocation is 100% indexed to the MSCI World ex USA Index which represents 85% of the market capitalization within the 22 developed market countries included in the index. Combined, the System's total stock exposure represents more than 80% of the global public equity market.

The System's fixed income allocation has historically emphasized index management and in fiscal year 2015 the Board elected to move to a 100% U.S. Treasury Index structure. The transition to a 100% Treasury Index structure removed credit risk from the fixed income allocation and increased total fund diversification. The System's overall portfolio is well diversified by asset class, investment structure, and individual security. The System's portfolio currently holds over 1,600 individual securities from 23 different countries.

Chart 4, on page 73, shows the fair value of the assets under management by investment type, category, and manager. A list of the ten largest Equity and Fixed Income holdings based on fair value at June 30, 2020, is included in Chart 5 on page 74. A complete list of security holdings is available upon request.

Investment Class Objectives

In order to achieve the total fund objectives, each asset type is assigned return objectives (listed below). Progress toward those benchmarks is closely monitored.

- | | | |
|----------------------|---|---|
| U.S. Stocks | – | Produce a total return that captures the Standard & Poor’s 500 Common Stock Index with commensurate volatility. |
| International Stocks | – | Produce a total return that captures the unhedged Morgan Stanley Capital International World ex USA Index with commensurate volatility. |
| U.S. Bonds | – | Produce a total return that captures the Bloomberg Barclays U.S. Treasury 1-3 Year Index with commensurate volatility. |
| Private Markets | – | Produce a total return that captures the blended return (based on PERS’ actual allocation) of: the National Council of Real Estate Investment Fiduciaries (NCREIF) Property Index -0.75%, and S&P 500 Index + 3% over rolling 10-year periods with commensurate volatility. |

Each of the System’s investment managers agrees to a performance benchmark which, when all the benchmarks in an investment class are combined, is expected to produce the class objective.

Investment Performance

The System’s custody bank calculates performance for the total fund, each asset class, and individual investment management firms employed by the Board. Performance calculations are prepared using time-weighted rate of return based on fair values. Returns in this report are gross of fees.

Chart 6, shown on page 75, shows a year-by-year comparison of how the total fund and each investment class compared with its corresponding objective.

Charts 7-9, on pages 76-77, compare 1, 3, 5, 10-year, and since-inception returns for each asset class to the corresponding objective for periods ended June 30, 2020.

Chart 10, on page 77, shows Private Markets returns for the fiscal year ended June 30, 2020, compared to since-inception returns using a blended objective.

The longest bull market in history officially came to an end during the 2020 fiscal year following the onset of the Covid-19 pandemic. However, in response to the massive fiscal and monetary stimulus enacted to offset the impacts of the pandemic, U.S. stocks recovered sharply in the final quarter of the fiscal year. The U.S. Equity allocation experienced a 7.4% return for the fiscal year and is up 14.1% for the ten-year period ended June 30, 2020. The System employs a 100% indexed structure in the asset class which keeps costs low and minimizes the variability of returns that is traditionally associated with active management.

International stocks underperformed U.S. stocks for the third consecutive fiscal year returning -5.0% for the period ended June 30, 2020. Country exposure in the international equity allocation is entirely in developed markets, and like the U.S. Equity portfolio, the allocation employs a 100% indexed structure. In the 2019 fiscal year the System transitioned the international stock benchmark index from the MSCI EAFE Index to the MSCI World ex USA Index, adding Canadian stocks to the allocation.

INVESTMENT SECTION

The U.S. Bond allocation is 100% invested in U.S. Treasury securities. Limiting the fixed income allocation to U.S. Treasuries removes credit risk from the allocation which increases diversification at the total fund level. Driven by an historic decline in interest rates, the U.S. fixed income allocation produced a 10.2% return for the year ended June 30, 2020. By March 2020, interest rates of U.S. Treasuries had fallen to their lowest point in history. With interest rates of 10-year U.S. Treasury securities below 1%, the potential for additional price gains diminished while the risk of potential price losses should interest rates rise had increased. In response to the asymmetric risk / reward relationship created by the decline in interest rates, in April 2020 the U.S. Bond allocation was transitioned from the Bloomberg Barclays U.S. Treasury Index to the Bloomberg Barclays U.S. Treasury 1-3 Year Index. Moving to a shorter duration benchmark removed the uncompensated interest rate risk from the U.S. fixed income allocation.

The Private Markets portfolio, which is comprised of private real estate and private equity, has 16³/₄ years of performance history as an asset class. Both private real estate and private equity produced positive absolute returns during fiscal year 2020; however, the total Private Markets portfolio underperformed the market objective for the period.

This report has been prepared in conjunction with the System's investment consultants, Jobs Peak Advisors and Callan Associates.

Public Employees' Retirement Board
State of Nevada
693 West Nye Lane
Carson City, Nevada 89703

**Re: Certification Letter for Actuarial Section of Financial Report for Fiscal Year Ended
June 30, 2020**

Dear Retirement Board Members:

This letter is to certify that Segal has prepared an actuarial valuation of the Public Employees' Retirement System of the State of Nevada as of June 30, 2020 and that such valuation is accurate and fairly presents the actuarial position of the Public Employees' Retirement System of Nevada.

The unfunded actuarial accrued liability is being amortized by level percentage-of-payroll payments over a year-by-year closed amortization period where each amortization period was set at the truncated average remaining period of all prior amortization layers until the average remaining amortization period was less than 20 years. At that point, amortization periods of 20 years are used. As of June 30, 2020, the funded ratios are 75.7% for Regular employees and 77.5% for Police/Fire employees.

Actuarial valuations are prepared annually by the independent actuary for the Public Employees' Retirement Board. The basic purposes of annual actuarial valuations are to determine the Retirement System's actuarial liabilities and the level percentage-of-payroll contribution rates required to fund the Retirement System on an actuarial reserve basis.

For funding purposes, to amortize the unfunded portion of actuarial accrued liability under the level percentage-of-payroll amortization method, the dollar amounts of calculated amortization payments increase in direct proportion to the assumed payroll growth rates of 5.50% per year for Regular employees and 6.50% per year for Police/Fire employees. These payroll growth rates are based on a 2.75% per year inflation assumption.

The payroll growth assumptions are set by the Board and affect the timing of payments toward the unfunded liabilities. Considerations for setting these assumptions include future financial conditions that are difficult for Segal to evaluate. In recent years, payroll growth has been less than assumed. This has the effect of delaying contributions toward the unfunded liabilities and could result in increases to required contributions in future years. We recommend that the Board closely monitor actual payroll growth to verify that the assumptions remain valid.

5666878v7/01068.001

Public Employees' Retirement Board
November 20, 2020
Page 2

The most recent actuarial valuation prepared as of June 30, 2020 is based on the following major elements:

- Current benefit provisions (as specified in the Public Employees' Retirement Act).
- Membership data as of June 30, 2020 obtained from electronic files provided by the Retirement System. Membership data contained on the electronic files is examined and tested for reasonableness, but is not audited by the actuary.
- Assets as of June 30, 2020 obtained from the System's unaudited financial statements.
- Trend schedules for financial and actuarial sections of the Comprehensive Annual Financial Report (CAFR) as of June 30, 2020 (based upon data from the System, accepted without verification or audit, and upon results of the annual actuarial valuation).
- Actuarial assumptions and methods adopted by the Public Employees' Retirement Board.
- The funding policy adopted by the Retirement Board.

A complete copy of the June 30, 2020 actuarial valuation is available from the System. The actuarial valuation report contains a description of the plan provisions. The Public Employees' Retirement System of the State of Nevada is a cost-sharing multiple employer plan.

Each annual actuarial valuation involves a projection of the benefits expected to be paid in the future to all members of the Retirement System. The projection of expected future benefit payments is based on the benefit provisions in effect on the actuarial valuation date. (See the Plan Summary section of this Annual Financial Report for a summary of current benefit and contribution provisions.)

Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are presented to meet regulatory, legislative and client requirements. Our Actuarial Technology and Systems unit, comprised of both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible actuary.

List of Supporting Schedules

The following schedules and summaries prepared by Segal are included within this Actuarial Section:

- Summary of Actuarial Assumptions and Methods
- Schedules of Funding Progress
- Schedule 1 - Retirement System Membership
- Schedule 2 - Active Member Valuation Data
- Schedule 3 - Pay Status Participants Added to and Removed from the Rolls

Public Employees' Retirement Board
 November 20, 2020
 Page 3

- Schedule 4 – Schedule of Funded Liabilities by Type
- Schedule 5 - Analysis of Actuarial Experience
- Schedule 6 – Schedule of Employer Contributions
- Schedule 7 – Schedule of Participating Employers

We have also included the following two items:

- Distribution of Retired Members and Beneficiaries by Type as of June 30, 2020
- New Retired Members for Year Ended June 30, 2020

The Public Employees' Retirement Act requires an adjustment in the statutory contribution rates on July 1 of each odd-numbered year based on the actuarially determined rates indicated in the actuarial valuation report for the immediately preceding year. Rates are only adjusted upward if the new rates are more than 0.50% higher than the existing rate for Employer-Pay members and if the new rates (for each the employee and the employer) are more than 0.25% higher for Employee/Employer members. Rates are only adjusted downward if the new rates are more than 2.00% lower than the existing rate for Employer-Pay members (and adjusted only by the amount in excess of 2.00%) and if the new rates (for each the employee and the employer) are more than 1.00% lower than the existing rate for Employee/Employer Members (and adjusted only by the amount in excess of 1.00%). Rates for each the employee and the employer are rounded to the nearest 0.25% of payroll.

Since the actuarially determined rates from this valuation were not within the ranges previously noted for Regular and Police/Fire members and this valuation year is an even numbered year, the following adjustments in the statutory contribution rates for Regular and Police/Fire members are required for fiscal years July 1, 2021 through June 30, 2023 as a result of this valuation.

Employer-Pay	<u>Regular Employees</u>	<u>Police/Fire Employees</u>
Statutory Rate for Fiscal Years July 1, 2019 through June 30, 2021	29.25%	42.50%
Actuarially Determined Contribution Rate per June 30, 2020 Actuarial Valuation	29.84%	43.93%
Statutory Rate for Fiscal Years July 1, 2021 through June 30, 2023	29.75%	44.00%
Employee/Employer-Pay	<u>Regular Employees</u>	<u>Police/Fire Employees</u>
Statutory Rate for Fiscal Years July 1, 2019 through June 30, 2021	30.50%	44.00%
Actuarially Determined Contribution Rate per June 30, 2020 Actuarial Valuation	31.21%	45.42%
Statutory Rate for Fiscal Years July 1, 2021 through June 30, 2023	31.00%	45.50%

Public Employees' Retirement Board
November 20, 2020
Page 4

The actuarial calculations prepared for funding purposes were made in accordance with generally accepted actuarial principles and practices. The information supplied in this letter is based on the current provisions of the Public Employees' Retirement Act and on the actuarial assumptions and methods adopted by the Public Employees' Retirement Board. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and the expectations for the plan. The payroll growth assumption should be closely monitored as noted above.

We are members of the American Academy of Actuaries and we meet the Qualification Standards to the American Academy of Actuaries to render the actuarial opinion herein.

Sincerely,

Segal

Brad Ramirez, FSA, MAAA, EA
Vice President & Consulting Actuary

Summary of Actuarial Assumptions and Methods

The actuarial assumptions and methods used in the June 30, 2020 actuarial valuation were adopted by the Public Employees' Retirement Board and were based on the results of the experience review issued October 16, 2017.

The assumptions have been set in accordance with Actuarial Standard of Practice (ASOP) No. 35, "Selection of Demographic and Other Non-economic Assumptions for Measuring Pension Obligations" and ASOP No. 27 "Selection of Economic Assumptions for Measuring Pension Obligations." These Standards of Practice put forth guidelines for the selection of the various actuarial assumptions utilized in a pension plan actuarial valuation.

Economic Assumptions

Investment Return: 7.50% per year¹

Administrative Expenses: 0.15% of payroll added to Normal Cost

Salary Increases:

Inflation: 2.75% plus

Productivity pay increases: 0.50% plus

Promotional and merit salary increases:

Years of Service	Rate (%)	
	Regular	Police/Fire
Less than 1	5.90	10.65
1	4.80	7.15
2	4.00	5.20
3	3.60	4.60
4	3.30	4.30
5	3.00	4.15
6	2.80	3.90
7	2.70	3.50
8	2.50	3.15
9	2.35	2.90
10	2.15	2.50
11	1.75	1.90
12	1.50	1.50
13	1.25	1.30
14	1.10	1.30
15 & Over	1.00	1.30

Future salary increases are assumed to occur at the beginning of the year.

¹ Includes inflation at 2.75% per year.

- Rate Payroll:** The payroll for the coming year is based on actual annualized payroll for the actives as of the valuation date and projected by the salary scale.
- Payroll Growth (Funding):** 5.50% per year for Regular employees
6.50% per year for Police/Fire employees
- Post-Retirement Benefit Increases:** For current retirees and beneficiaries, future Post-Retirement Benefit Increases reflect actual changes in historical CPI and are assumed to follow the formulas described below. For future retirees, those hired prior to 2010 are assumed to reach the cap after 16 years of retirement. Those hired in between 2010 and 2015 are also assumed to reach the cap after 16 years of retirement. Those hired after 2015 will never receive an annual increase that exceeds 2.75%. Underlying all of these assumptions is that CPI will grow over time at a rate of 2.75% per year.

For members with an effective date of membership before January 1, 2010:

The lesser of:

- a. 2% per year following the third anniversary of the commencement of benefits, 3% per year following the sixth anniversary, 3 ½% per year following the ninth anniversary, 4% per year following the twelfth anniversary and 5% per year following the fourteenth anniversary, or
- b. The annual benefit increase is equal to the average percentage increase in the Consumer Price Index (or other Board approved index) for the three preceding years.

In any event, a member's benefit must be increased by the percentages in paragraph (a) if the benefit of a member has not been increased at a rate greater than or equal to the average of the Consumer Price Index (All Items) (or other Board approved index) for the period between retirement and the date of increase.

For members with an effective date of membership on or after January 1, 2010 and before July 1, 2015:

Same as above, except the increases do not exceed 4% per year.

Post-Retirement Benefit Increases (continued): *For members with an effective date of membership on or after July 1, 2015:*

2% per year following the third anniversary of the commencement of benefits, 2.5% per year following the sixth anniversary, the lesser of 3% or the CPI for the preceding calendar year following the ninth anniversary.

Non-Economic Assumptions

Retirement Rates:

The assumed retirement rates, which project the percentage of eligible employees who will retire, are shown below:

Regular members with an effective date of membership before July 1, 2015:

Age	Years of Service (%)					
	5 – 9	10 – 19	20 – 24	25 – 29	30 – 32	33 or More
45-49	0.00	0.00	0.75	6.50	16.00	16.00
50-54	0.50	1.50	1.50	8.50	18.00	18.00
55-59	1.50	3.50	5.00	12.00	20.00	20.00
60-61	6.50	11.00	17.00	22.00	22.00	22.00
62-64	9.00	13.00	17.00	22.00	22.00	22.00
65-69	20.00	20.00	22.00	25.00	25.00	25.00
70-74	30.00	30.00	40.00	40.00	40.00	40.00
75 & Over	100.00	100.00	100.00	100.00	100.00	100.00

Regular members with an effective date of membership on or after July 1, 2015:

Age	Years of Service (%)					
	5 – 9	10 – 19	20 – 24	25 – 29	30 – 32	33 or More
45-49	0.00	0.00	0.75	6.50	6.50	16.00
50-54	0.50	1.50	1.50	8.50	8.50	18.00
55-59	1.50	3.50	5.00	12.00	20.00	20.00
60-61	6.50	11.00	17.00	22.00	22.00	22.00
62-64	9.00	13.00	17.00	22.00	22.00	22.00
65-69	20.00	20.00	22.00	25.00	25.00	25.00
70-74	30.00	30.00	40.00	40.00	40.00	40.00
75 & Over	100.00	100.00	100.00	100.00	100.00	100.00

Police/Fire members:

Age	Years of Service (%)				
	5 – 9	10 – 19	20 – 24	25 – 29	30 or More
Less than 40	0.00	0.00	0.00	0.00	0.00
40-44	0.00	0.50	3.50	0.00	0.00
45-49	0.00	1.00	6.50	18.00	18.00
50-54	1.50	4.50	13.00	20.00	24.00
55-59	3.50	10.00	20.00	25.00	28.00
60-64	9.00	18.00	25.00	35.00	35.00
65-69	50.00	50.00	60.00	60.00	60.00
70 & Over	100.00	100.00	100.00	100.00	100.00

The retirement age for inactive vested members is equal to their earliest unreduced retirement age.

Termination Rates:

The assumed termination rates are shown below.

Years of Service	Termination Rates (%)	
	Regular	Police/Fire
0 – 1	16.00	15.00
1 – 2	12.50	8.00
2 – 3	10.25	7.50
3 – 4	8.00	6.00
4 – 5	7.50	5.00
5 – 6	6.00	3.75
6 – 7	5.25	3.50
7 – 8	4.25	2.50
8 – 9	4.00	2.25
9 – 10	3.75	1.90
10 – 11	3.25	1.50
11 – 12	3.00	1.30
12 – 13	2.75	1.00
13 – 14	2.50	0.90
14 – 15	2.25	0.80
15 – 16	2.00	0.70
16 – 17	2.00	0.60
17 – 18	1.75	0.50
18 – 19	1.75	0.50
19 – 20	1.75	0.50
20 & Over	1.75	0.45

No termination is assumed after a member reaches earliest unreduced retirement age.

Disability Rates:

The assumed disability rates are shown below for selected ages:

Age	Disability Rates (%)	
	Regular	Police/Fire
22	0.01	0.00
27	0.03	0.06
32	0.06	0.12
37	0.10	0.30
42	0.21	0.45
47	0.35	0.65
52	0.60	0.80
57	0.75	0.65
62	0.35	0.50

No disability rates are assumed after age 65.

Disability rates are applied only for members with more than 5 years of service and less than 30 years of service for Regular members with an effective date of membership before July 1, 2015, less than 33 1/3 years of service for Regular members with an effective date of membership on or after July 1, 2015, or 25 years for Police/Fire members.

Mortality Tables:

Pre-Retirement: Headcount-Weighted RP-2014 Employee Table, projected to 2020 with Scale MP-2016.

Healthy: Headcount-Weighted RP-2014 Healthy Annuitant Table projected to 2020 with Scale MP-2016, set forward one year for spouses and beneficiaries.

For ages less than 50¹, mortality rates are based on the Headcount-Weighted RP-2014 Employee Mortality Tables. Those mortality rates are adjusted by the ratio of the mortality rate for members at age 50 to the mortality rate at age 50 from the Employee mortality tables listed above. The mortality rates are then projected to 2020 with Scale MP-2016.

Disabled: Headcount-Weighted RP-2014 Disabled Retiree Table, set forward four years.

¹ The RP-2014 Healthy Annuitant Mortality Tables have rates only for ages 50 and later.

The schedules below show the assumed healthy retiree mortality rates and projected life expectancies for selected ages:

Regular and Police/Fire Members				
Age	Mortality Rates		Expected Years of Life Remaining	
	Males	Females	Males	Females
40	0.20%	0.14%	40.4	43.6
50	0.49%	0.38%	31.4	34.5
60	0.90%	0.59%	23.2	25.9
70	1.81%	1.26%	15.6	17.7
80	4.55%	3.42%	9.1	10.5

The RP-2014 Headcount-Weighted Mortality Tables, set forward one year for spouses and beneficiaries, reasonably reflect the projected mortality experience of the Plan as of the measurement date. The additional projection of 6 years is a provision made for future mortality improvement.

Presence and Age of Beneficiary:

It is assumed for purposes of the actuarial valuation that beneficiaries of female members are two years older than the female member. Beneficiaries of male members are assumed to be three years younger than the male member. Spouses are assumed to be of the opposite sex of the member.

Since pre-retirement death benefits are payable to a surviving beneficiary of an unmarried member, all members are assumed to have a beneficiary upon pre-retirement death.

The unmodified option is a straight life annuity except for “employer-pay” Police/Fire retirees, for whom it is a 50% joint and survivor annuity. Existing “employer-pay” Police/Fire retirees with an unmodified option who retired after June 30, 1981 and before July 1, 2011 have been valued assuming no surviving spouse, pending the results of an analysis and verification of spousal information.

70% of “employer-pay” police/fire male members and 55% of “employer-pay” police/fire female members are assumed to be married at retirement.

Dependent Children:

The assumption for dependent children in the actuarial valuation is one dependent child who is 28 years younger than the employee.

Unknown Data for Members:

Same as those exhibited by members with similar known characteristics. If not specified, Regular members are assumed to be female, and Police/Fire members are assumed to be male.

Form of Payment:

All active and inactive members are assumed to elect the unmodified option at retirement (Option 1).

Actuarial Value of Assets:

Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the actuarial value, and is recognized over a five-year period, further adjusted, if necessary, to be within 30% of the market value.

Actuarial Cost Method:

Entry Age Normal Actuarial Cost Method. Entry Age is the age at the time the participant commenced employment. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of salary, with Normal Cost determined based on the plan provisions and benefit accrual rate applicable to that individual.

Amortization Policy:

For funding purposes, the UAAL, (i.e., the difference between the Actuarial Accrued Liability and the Valuation Value of Assets), as of June 30, 2011 shall continue to be amortized over separate 30-year period amortization layers based on the valuations during which each separate layer was previously established.

Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of June 30 was amortized over a period equal to the truncated average remaining amortization period of all prior UAAL layers. This occurred until the average remaining amortization period was less than 20 years. At that point, amortization periods of 20 years are used for actuarial gains and losses.

Any new UAAL as a result of change in actuarial assumptions or methods was amortized over a period equal to the truncated average remaining amortization period of all prior UAAL layers. This occurred until the average remaining amortization period was less than 20 years. At that point, amortization periods of 20 years are used for assumption or method changes.

Unless an alternative amortization period is recommended by the Actuary and accepted by the Board based on the results of an actuarial analysis:

- with the exception noted below, the increase in UAAL as a result of any plan amendments will be amortized over a period of 15 years;
- the increase in UAAL that would result from a temporary retirement incentive will be pre-funded by the participating employer(s).

UAAL layers shall be amortized over “closed” amortization periods so that the amortization period for each layer decreases by one year with each actuarial valuation.

UAAL layers shall be amortized as a level percentage of payroll so that the amortization amount in each year during the amortization period shall be expected to be a level percentage of covered payroll, taking into consideration the current assumption for general payroll increase.

If an overfunding exists (i.e., the total of all UAAL becomes negative so that there is a surplus), such surplus and any subsequent surpluses will be amortized over an “open” amortization period of 30 years. Any prior UAAL amortization layers will be considered fully amortized, and any subsequent UAAL will be amortized over 20 years as the first of a new series of amortization layers.

These amortization policy components will apply separately to each of the Regular and Police/Fire UAAL cost groups.

Changes in Actuarial Assumptions and Methods Since the Previous Year:

There were no changes in actuarial assumptions or cost methods since the preceding valuation.

2020	1,152.8	37,004.7	22,506.0	46,171.7	100	100	35.6

¹ Includes liability for post-retirement benefit increases.

Schedule 5

Analysis of Actuarial Experience

**Gains and Losses in Actuarial Accrued Liabilities (UAAL) During Year Ended
June 30, 2020 Resulting from Unfunded Differences Between Assumed Experience and
Actual Experience (dollar amounts in millions)**

Type of Activity	Regular		Police/Fire	
	Amount	As % of AAL	Amount	As % of AAL
Age and Service Retirements. If members retire at older ages or with lower final average pay than assumed, there is a gain. If retirements occur at younger ages with higher average pay, there is a loss.	\$(222.3)	(0.45%)	\$(47.9)	(0.35%)
Disability Retirements. If disability claims are less than assumed, there is a gain. If there are more claims, there is a loss.	(4.3)	(0.01%)	(3.1)	(0.02%)
Pre- and Post-Retirement Mortality. If retirees live longer than assumed, there is a loss. If retirees live shorter than assumed, there is a gain.	20.9	0.04%	(17.3)	(0.13%)
Post-Retirement Benefit Increases. If increases are more than assumed, there is a loss. If increases are less than assumed, there is a gain.	372.8	0.79%	112.7	0.83%
Withdrawal From Employment. If more liabilities are released by withdrawals than assumed, there is a gain. If less liabilities are released, there is a loss.	(76.0)	(0.16%)	(17.0)	(0.13%)
Pay and Service Increases. If there are smaller pay and service increases than assumed, there is a gain. If there are greater increases, there is a loss.	24.6	0.05%	7.5	0.06%
Active New Entrants. Cost due to new hires.	(63.6)	(0.14%)	(9.7)	(0.07%)
Active Rehires. Some new active members have past service credits reinstated, thereby increasing costs due to the unanticipated liabilities.	(40.8)	(0.09%)	(5.2)	(0.04%)
Inactive and Retiree Showups. Persons in inactive or pay status who are added to the valuation data during the year.	(14.4)	(0.03%)	(2.1)	(0.02%)
Other. Miscellaneous gains and losses result from data changes and adjustments, and other miscellaneous impacts on the valuation results. Includes actual purchase of service contributions.	1.4	0.00%	11.1	0.08%
Total Liability Experience Gain (Loss) During Year.	(1.7)	0.00%	29.0	0.21%
Investment Income. If there is a greater investment income than assumed, there is a gain. If there is less income, there is a loss.	5.0	0.01%	2.6	0.02%
Contributions. If contributions are greater than assumed, there is a gain. If contributions are lower, there is a loss.	(137.0)	(0.30%)	(41.7)	(0.31%)
Administrative Expenses. If administrative expenses are lower than assumed, there is a gain. If administrative expenses are higher, there is a loss.	(1.7)	0.00%	(0.2)	0.00%
Total Experience Gain (Loss) During the Year.	(135.4)	(0.29%)	(10.3)	(0.08%)

Note: This Schedule has been expanded in 2020 to show the effect of contribution experience and administrative expense experience on the total gain (loss).

Schedule 6
 Schedule of Employer Contributions
 2011 to 2020

Fiscal Year Ended June 30	Regular		Police/Fire		Total	
	Annual Required Contribution ¹	Percentage Contributed	Annual Required Contribution ¹	Percentage Contributed	Annual Required Contribution ¹	Percentage Contributed
2011	\$1,057,566,978	89%	\$372,888,833	88%	\$1,430,455,811	88%
2012	1,028,518,922	96	356,627,690	96	1,385,146,612	96
2013	1,140,004,053	86	377,692,041	88	1,517,696,095	86
2014	1,223,519,948	87	354,604,416	96	1,578,124,364	89
2015	1,243,009,888	87	357,365,587	98	1,600,375,475	90
2016	1,235,466,166	98	360,063,071	100	1,595,529,237	98
2017	684,350,580	103	194,707,470	102	879,058,050	103
2018	698,761,837	103	206,915,231	101	905,677,068	103
2019	714,413,481	105	217,139,466	100	931,552,947	104
2020	727,154,285	111	223,353,811	106	950,508,096	110

¹ Reflects employer contributions only. Determined using 5% assumed payroll growth and 30-year frozen period for amortizing unfunded actuarial accrued liability.

Starting in the year ended June 30, 2017, pursuant to GASB Statement No. 82, the financial statements and annual required contributions recognize half of the employer contributions made on behalf of Employer-Pay members as member contributions.

Schedule 7
 Schedule of Participating Employers
 2011 to 2020

Fiscal Year Ended June 30	Number of Participating Employers ¹
2011	N/A
2012	N/A
2013	N/A
2014	189
2015	195
2016	202
2017	204
2018	210
2019	212
2020	215

¹ Before 2020, the number of participating employers is the number of employers that made contributions during each fiscal year, as listed in Appendix A of each year's GASB Statement No. 68 report, based on information provided by the System. The GASB Statement No. 68 report was first issued for the fiscal year ended June 30, 2014. The counts in this Schedule also include PERS, which is not considered to be a participating employer for purposes of GASB Statement No. 68, starting with the June 30, 2015 report.

Starting in the entry for 2020, the number of participating employers shown in this Schedule was provided by the System for the purpose of this Schedule. This count may differ slightly from the count in the GASB Statement No. 68 report, which is limited to employers that contributed during the fiscal year.

Distribution of Retired Members and Beneficiaries
By Type as of June 30, 2020

Public Employees' Retirement Board
693 West Nye Lane
Carson City, Nevada 89703

Dear Retirement Board Members:

We are pleased to submit this Governmental Accounting Standards Board (GASB) Statement No. 67 Actuarial Valuation as of June 30, 2020. It contains various information that will need to be disclosed in order to comply with GASB Statement No. 67.

This report was prepared in accordance with applicable Actuarial Standards of Practice at the request of the Board to assist in administering the Plan. We are not accountants, but are familiar with the GASB requirements and believe that the calculations are consistent with those requirements. The census and financial information on which our calculations were based was prepared by the Retirement Office. That assistance is gratefully acknowledged.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period or additional cost or contribution requirements based on the plan's funded status); and changes in plan provisions or applicable law.

The actuarial cost method used in the calculation of the Total Pension Liability (Entry Age Method) is the same cost method used for funding purposes. All actuarial assumptions for these calculations are the same as for funding purposes, with the exception of the payroll growth assumption, which is 5% per year for GASB 67 calculations.

The assumed rate of return on assets for funding purposes is 7.50% per year, net of investment fees, and this is also the assumed rate used to discount the Total Pension Liability.

5667082v3/01068.001

Public Employees' Retirement Board
 November 20, 2020
 Page 2

The following supporting schedules are extracts from Segal's GASB Statement No. 67 Actuarial Valuation as of June 30, 2020:

- Schedule of Net Pension Liability
- Schedule of Sensitivity of the Net Pension Liability to Changes in the Discount Rate
- Schedule of Changes in Net Pension Liability
- Schedule of Contributions

Segal valuation results are based on proprietary actuarial modeling software. The actuarial valuation models generate a comprehensive set of liability and cost calculations that are presented to meet regulatory, legislative and client requirements. Our Actuarial Technology and Systems unit, comprised of both actuaries and programmers, is responsible for the initial development and maintenance of these models. The models have a modular structure that allows for a high degree of accuracy, flexibility and user control. The client team programs the assumptions and the plan provisions, validates the models, and reviews test lives and results, under the supervision of the responsible actuary.

The actuarial calculations were completed under the supervision of Mark Hamwee, FSA, MAAA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and expectations for the Plan.

Sincerely,

Segal

Brad Ramirez, FSA, MAAA, EA
 Vice President & Consulting Actuary

Mark Hamwee, FSA, MAAA, EA
 Vice President & Actuary

Schedule of Net Pension Liability

The components of the Net Pension Liability are as follows:

Measurement Date	June 30, 2020	June 30, 2019
Total Pension Liability	\$60,663,454,082	\$57,920,215,973
Plan Fiduciary Net Position	\$46,735,117,356	\$44,284,252,583
Net Pension Liability	\$13,928,336,726	\$13,635,963,390
Plan Fiduciary Net Position as a percentage of the Total Pension Liability	77.04%	76.46%

The Net Pension Liability was measured as of June 30, 2020 and 2019 and determined based upon the Plan Fiduciary Net Position (plan assets) and Total Pension Liability from actuarial valuations as of June 30, 2020 and 2019, respectively.

Schedule of Sensitivity of the Net Pension Liability to Changes in the Discount Rate

The following presents the Net Pension Liability of the NVPERS as of June 30, 2020, calculated using the discount rate of 7.50%, as well as what the NVPERS Net Pension Liability would be if it were calculated using a discount rate that is 1 percentage point lower (6.50%) or 1 percentage point higher (8.50%) than the current rate:

	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
Net Pension Liability as of June 30, 2020	\$21,722,824,038	\$13,928,336,726	\$7,447,799,867

Schedule of Changes in Net Pension Liability – Last Two Fiscal Years

Measurement Date	June 30, 2020	June 30, 2019

2019	981,782,636	965,518,968	16,263,668	6,508,871,854	14.83%
2020	1,078,182,621	1,045,108,804	33,073,817	6,786,900,381	15.40%

Notes:

All contributions shown reflect employer-paid contributions only. Member contributions are excluded. Starting in 2016, pursuant to GASB No. 82, contributions are classified as member contributions for the purposes of GASB No. 67 if they are made by an employer to satisfy what are actually deemed to be member contribution requirements.

Actuarially Determined Contributions above are based on actuarially determined contribution rates (employer portion only) from the rate-setting year applicable to year shown, applied to covered payroll for year shown.

¹ Includes employer contributions towards administrative expenses.

² Measurement as of beginning of year.

STATISTICAL SECTION

THIS PAGE INTENTIONALLY LEFT BLANK

OVERVIEW

This section of the Public Employees’ Retirement System of Nevada’s Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary says about the System’s overall financial health.

FINANCIAL TRENDS

These schedules contain trend information to help the reader understand how the System’s financial performance has changed over time.

- Schedule 1 Changes in Net Position – *Last Ten Years*
- Schedule 2 Benefit and Refund Deductions from Net Position – *Last Ten Years*

REVENUES

This schedule contains information to help the reader understand the System’s funding over the last ten years.

- Schedule 3 Contribution Rates – *Last Ten Years*

OPERATIONS

These schedules contain information about the System’s operations.

- Schedule 4 Retired Members by Type of Benefit
- Schedule 5 Average Benefit Payments
- Schedule 5-A New Retired Members Average Benefit Payments
- Schedule 6 Average Age at Retirement – *Last Ten Years*
- Schedule 7 Number of Active Members per Retiree – *Last Ten Years*
- Schedule 8 Schedules of Funding Progress – *Last Ten Years*
- Schedule 9 Participating Employers
- Schedule 10 Principal Participating Employers – *Current Year and Nine Years Ago*
- Schedule 11 Average Age and Service Statistics for Members – *Last Ten Years*
- Schedule 12 Average Salaries for Members – *Last Ten Years*

Change in net position	<u>\$ 4,348.9</u>	<u>\$ 644.5</u>	<u>\$ 2,934.8</u>

*Information is from internal System records.

Both the employer and plan members contributions have been restated in this schedule for fiscal years 2011 through 2016 as a result of implementing GASB 82 (see below).

Statement No. 82, an amendment of GASB Statements No. 67, No. 68, and No. 73, this statement addresses classification of employer-paid contributions. This statement requires certain contribution payments made by the employer to be classified as plan member contributions.

\$10,000 & Over	319	318	1	0	0
Total	9,365	7,536	598	958	273

The values in these tables represent the number of individuals receiving benefit payments.

Individuals receiving service retirement are members of the System that received a benefit payment during fiscal year 2020 which was not a disability retirement.

Members with five or more years of service who become totally unable to perform their job or any comparable job because of injury or mental or physical illness are eligible to apply for disability retirement. Once approved by the Board, members receive a monthly disability retirement payment.

When a member retires there are seven retirement options. Option 1 pays the full monthly benefit but provides no income protection for a beneficiary after death for Regular members. Beneficiary retirements are paid to beneficiaries of retired members who have passed away with a retirement of Option 1 (Police/Fire members only) and Options 2 through 7 for all members.

Survivor retirements are paid when a member dies prior to retirement.

For more information regarding the various retirement types, refer to the Plan Summary starting on page 133.

*Information provided by Segal Consulting, the System's actuary.

SCHEDULE 5

AVERAGE BENEFIT PAYMENTS*

<u>June 30</u>		<u>Regular Members</u>	<u>Police/Fire Members</u>
2011	Average monthly benefit	\$2,539	\$4,348
	Average monthly compensation at retirement	\$4,890	\$7,343
	Number of new retirees	2,933	433
	Average years of service at retirement	19.38	22.53

Number of new retirees excludes survivors and beneficiaries.

The average monthly benefit and number of new retirees is from Segal Consulting, the System's actuarial firm. All other data is from internal System records.

Note: Average age at retirement is now shown on Schedule 6.

For GASB reporting purposes, beginning in 2012 Schedule 5-A is organized by years of credited service.

*Information provided by Segal Consulting, the System's actuary.

PLAN SUMMARY

THIS PAGE INTENTIONALLY LEFT BLANK

Administration

PERS provides retirement, disability, and death benefits to long-term public employees. The System includes the employees of Nevada counties, cities, schools, state government, and other local public employers.

The governing authority of the System is a 7-member board appointed by the Governor. Day-to-day operations are managed by the Executive Officer. Operating funds are provided by transfer of an administrative fee assigned to each member and benefit recipient. Monthly fees at June 30, 2020, were \$5.79 for each Regular member and benefit recipient and \$6.11 for each Police/Fire member and benefit recipient.

Membership

An employee of a participating public employer is required to be a member of the System from the first day of service if he or she is employed in a position which is normally considered to be half-time or more according to the full-time work schedule established by the public employer. Persons employed in an approved police or fire position are covered under the Police/Fire sub-fund. Persons who are not police or fire employees are covered under the Regular sub-fund. Membership is canceled upon refund, retirement, or death. Membership is not canceled automatically upon termination of employment. A member must apply for a refund, distribution, or retirement to cancel membership.

Types of Contribution Plans

All pay that meets the definition of compensation as defined in NRS 286.025(2) is subject to retirement contribution. New hires (in agencies which did not elect the Employer-Pay Contribution Plan (EPC) prior to July 1, 1983) have the option of selecting EPC or the Employee/Employer Contribution Plan. Each plan is described below.

Employer-Pay Contribution Plan (EPC)

Under EPC, contributions are paid on the employee's behalf by their public employer. However, the employee shares equally in the cost of the contribution rate either through salary reduction or in lieu of a promised pay increase. EPC contributions are not deposited to the individual member's account and are not available for refund upon termination of employment. Effective July 1, 2019, the EPC contribution rates are 29.25% for Regular members and 42.50% for Police/Fire members.

Employee/Employer Contribution Plan

Effective July 1, 2019, under this plan, the Regular member and the employer each contribute 15.25% of compensation to the System. Police/Fire members and their employers each contributed 22.00% of compensation. Employee contributions made under this plan are refundable upon termination of employment. Employer contributions are not refundable.

Service

Public employees, other than school employees, earn service credit for years, months, and days actually worked. School employees, who are not regular 12-month employees, receive service credit on the basis of a full year if they work full-time for the entire school year. For these same school employees, service for a part of the school year is credited on a ratio of one and one-third days for each day worked.

PLAN SUMMARY

Purchase of Service

Members with five years of creditable service may purchase up to five years of service credit. The member must pay the full actuarial cost associated with age and average compensation at the time of purchase. Members entering the System on or after July 1, 2015, may purchase service; however, the service will not count towards retirement eligibility unless the member has a family medical emergency.

Refund of Contributions

Members who have contributed under the Employee/Employer Contribution plan may withdraw employee contributions if terminating all employment for which contribution is required or if employed in a position ineligible for membership for at least 90 days. A refund cancels all rights of membership.

Repayment of Refunded Contributions

Members who receive a refund of employee contributions and later return to work and re-establish active membership for a period of at least six months may repay the refunded contributions and restore service credit. Repayment, including interest at the actuarially determined rate, may be in the form of a lump-sum payment or by monthly installments. Service will not be restored until repayment is complete.

Benefits

The 2009 Legislature passed Senate Bill 427 which provided for various changes to the System and members newly hired into the System on or after January 1, 2010. The 2015 Legislature passed Senate Bill 406 which applies to members newly hired on or after July 1, 2015. Such changes are noted within each subject area below.

Service Retirement Vesting

Contributing members of the System earn the right to receive a retirement benefit after five years of service.

Service Retirement

Requirements for Regular members to retire with an unreduced benefit – age 65 with five years of service, **or** age 60 with ten years of service, **or** any age with thirty years of service.

For Regular members who enter the System on or after January 1, 2010, to retire with an unreduced benefit – age 65 with five years of service, **or** age 62 with ten years of service, **or** any age with thirty years of service.

For Regular members who enter the System on or after July 1, 2015, to retire with an unreduced benefit – age 65 with five years of service, or age 62 with ten years of service, or age 55 with 30 years of service, or at any age with 33 1/3 years of service.

Requirements for Police/Fire members to retire with an unreduced benefit – age 65 with five years of service, **or** age 55 with ten years of Police/Fire service, **or** age 50 with twenty years of Police/Fire service, **or** at any age with twenty-five years of Police/Fire service.

For Police/Fire members who enter the System on or after January 1, 2010, to retire with an unreduced benefit – age 65 with five years of service, **or** age 60 with ten years of Police/Fire service, **or** age 50 with twenty years of Police/Fire service **or** any age with thirty years of total service.

Only service performed in a position as a police officer or firefighter may be counted towards eligibility for retirement as Police/Fire accredited service.

Early Retirement Penalty

Members with the years of service necessary to receive a retirement benefit but who have not reached the age for an unreduced benefit may retire at any age with the benefit reduced by 4% for each full year they are under the required age.

Members entering the System on or after January 1, 2010, with the years of service necessary to receive a retirement benefit but who have not reached the age for an unreduced benefit may retire at any age with the benefit reduced by 6% for each full year they are under the required age.

Important Factors for Determining Retirement Benefits

Benefit amounts are based on three factors:

1. Average compensation – defined as the average of 36 highest consecutive months of compensation and, for members entering the system on or after January 1, 2010, the average of 36 highest consecutive months of compensation with a provision that each 12-month period of salary may not increase greater than 10% of the prior 12 months of salary reported. Salary increases due to promotion and assignment-related compensation are excluded from the salary cap calculation.
2. Service credit – years, months, and days worked.
3. Selection of retirement plan – prospective retirees may elect one of seven retirement options.

Option 1 – (the unmodified plan) for Regular members – Pays the full monthly benefit earned but provides no income protection for beneficiary after death.

Option 1 – (the unmodified plan) for Police/Fire members – Pays the full monthly benefit earned for the retiree’s lifetime. A person who was the spouse or registered domestic partner at time of retirement shall be entitled, at the time of the retired employee’s death or upon the attainment of age 50, whichever is later, to a benefit of 50% of the deceased retired employee’s benefit earned at the time of his/her death in an eligible police/fire position. This benefit is available only if you are contributing under the Employer Pay contribution plan (EPC) at the time of retirement. Otherwise, no beneficiary allowance is available under this option.

Option 2 – Provides an actuarially reduced lifetime benefit. Upon the death of the retiree, the same benefit continues for the lifetime of the beneficiary.

Option 3 – Provides an actuarially reduced lifetime benefit. Upon the death of the retiree, 50% of the benefit continues for the lifetime of the beneficiary.

Option 4 – Provides an actuarially reduced lifetime benefit. Upon the death of the retiree and upon the beneficiary reaching age 60, the same benefit continues for the lifetime of the beneficiary.

PLAN SUMMARY

Option 5 – Provides an actuarially reduced lifetime benefit to retiree. Upon the death of the retiree and upon beneficiary reaching age 60, 50% of the benefit continues for the lifetime of the beneficiary.

Option 6 – Provides an actuarially reduced lifetime benefit to retiree. Upon death of the retiree, this option provides to the beneficiary a specific sum per month, which cannot exceed the monthly benefit paid to retiree.

Option 7 – Provides an actuarially reduced lifetime benefit to retiree. Upon the death of the retiree this option provides that upon the beneficiary reaching age 60, a specific sum per month, which cannot exceed the monthly benefit paid to retiree.

Post-Retirement Benefit Increases

Retirees are eligible for annual benefit increases starting the fourth year of initially receiving benefits. Benefits are increased annually on the first day of the month following the anniversary of the commencement of benefits. The increases begin at 2% in years four, five, and six; increase to 3% in years seven, eight, and nine; 3.5% in years ten, eleven, and twelve; 4% for years thirteen and fourteen; and 5% in year fifteen and each year thereafter. If the benefit outpaces inflation in the period since retirement, the increase may be capped by a rolling three-year average of the Consumer Price Index (all items).

Retirees who enter the System on or after January 1, 2010, are eligible for annual benefit increases starting the fourth year of initially receiving benefits. Benefits are increased annually on the first day of the month following the anniversary of the commencement of benefits. The increases begin at 2% in years four, five, and six; increase to 3% in years seven, eight, and nine; 3.5% in years ten, eleven, and twelve; and 4% in year thirteen and each year thereafter. If the benefit outpaces inflation in the period since retirement, the increase may be capped by a rolling three-year average of the Consumer Price Index (all items).

Retirees who enter the System on or after July 1, 2015, are eligible for annual benefit increases starting the fourth year of initially receiving benefits. Benefits are increased annually on the first day of the month following the anniversary of the commencement of benefits. The increases begin at 2% in years four, five, and six; increase to 2.5% in years seven, eight, and nine; then adjust to the lesser of 3% or the increase, if any, in the Consumer Price Index (all items) for the preceding calendar year following the tenth year and every year thereafter.

Benefit Formula

The formula used for calculating retirement benefits is as follows:

- Total Service Credit Earned (or purchased) before July 1, 2001 X 2.5% = Service Time Factor
- Total Service Credit Earned (or purchased) on and after July 1, 2001 X 2.67% = Service Time Factor
- Total Service Time Factors X Average Monthly Compensation (36 Highest Consecutive Months of Salary) = Unmodified benefit (Option 1).

For members entering the System on or after January 1, 2010, the formula for calculating retirement benefits is as follows:

- Total Service Credit Earned (or purchased) X 2.5% = Service Time Factor
- Total Service Time Factor X Average Monthly Compensation (36 Highest Consecutive Months of Salary with applicable limits*) = Unmodified benefit (Option 1).

For Regular members entering the System on or after July 1, 2015, the formula for calculating retirement benefits is as follows:

- Total Service Credit Earned X 2.25% = Service Time Factor
- Total Service Time Factor X Average Monthly Compensation (36 Highest Consecutive Months of Salary with applicable limits*) = Unmodified benefit (Option 1).

*Each 12-month period of salary may not increase greater than 10% unless promotion or assignment related.

Maximum benefits are 90% of average compensation for individuals who became members before July 1, 1985, and 75% of average compensation for individuals who became members after June 30, 1985.

Actuarial reductions are based on the member's age and the beneficiary's age at the time of retirement, determined from tables supplied by the System's actuary.

Disability Retirement

Members with five or more years of service who become totally unable to perform their current or any comparable job because of an injury or mental or physical illness of a permanent nature are eligible to apply for disability retirement. The application must be filed with the System prior to termination of employment. Disability retirement benefits are calculated in the same manner as service retirement without reduction for age.

Survivor Benefits

Eligibility

Eligible survivors of a member who dies prior to retirement are entitled to a benefit if:

1. The member had two years of service in the two and one-half years immediately preceding death, or
2. The member had more than ten years of accredited service, or
3. The member's death was caused by an occupational disease or an accident arising out of or in the course of employment, regardless of service credit.

An additional benefit is available for a surviving spouse/registered domestic partner of an active member killed in the line of duty or in the course of employment regardless of service credit. See SB 406 below.

Eligible survivors:

1. Spouse or registered domestic partner
2. Each unmarried dependent child under age 18, or up to age 23 if a full-time student.

PLAN SUMMARY

3. Dependent parents, provided there are no other eligible survivors at the time of member's death.
4. If the member is unmarried at the time of death, one designated survivor beneficiary. Additional payees may also be designated to receive direct payment of a portion of the survivor beneficiary benefit.

Amount of Survivor Benefits

Generally, if a member dies with less than ten years of service, the spouse, registered domestic partner, or survivor beneficiary would receive \$450 per month and each dependent child would receive \$400 per month. The spouse, registered domestic partner, or survivor beneficiary would receive survivor benefits for his or her lifetime. Each unmarried dependent child would receive monthly benefits until age 18, or age 23 if he or she is a full-time student.

If a member dies with more than ten years of service credit, the spouse, registered domestic partner, or survivor beneficiary is entitled to a lifetime benefit. The amount of the benefit is based on the member's age, years of service, and average compensation at the time of death. A dependent child would receive the same benefits as previously described.

A member is able to designate one survivor beneficiary to receive benefits (as described above) to be paid if the member is unmarried at the time of death. A member may also designate additional payees to receive direct payment of a portion of the survivor beneficiary benefit.

SB 406

If a member is killed in the line of duty or the course of employment, the spouse of the member has additional benefit options pursuant to Senate Bill 406 of the 2015 Legislative session. The new benefit entitles the spouse to receive 50% of the salary of the member on the date of death, 100% of the retirement allowance that the member was eligible to receive based on the member's years of service obtained prior to death, or benefits in place prior to July 1, 2015, at the election of the spouse. This benefit is effective for benefits paid on or after July 1, 2015, on account of members killed in the line of duty or course of employment on or after July 1, 2013.
